Transportation and Climate Change

Developing Technologies, Policies, and Strategies

By Jonathan D. Rubin and Robert D. Noland

The rapid increases in the speed, efficiency, and accessibility of the transportation system over the past century have enabled unprecedented levels of social interaction and economic productivity throughout the world. Transportation for personal mobility and for the movement of freight is integral to the high standard of living in developed nations and to fostering growth in developing nations.

Transportation activity, however, is a major user of the world’s carbon-rich fossil fuels and a major source of carbon dioxide (CO2) and other greenhouse gas (GHG) emissions associated with climate change. In the past 40 years, the developed world has mitigated many of the adverse environmental and public health impacts from transportation emissions—particularly in reducing the tailpipe pollutants from the burning of gasoline and diesel fuels.

Challenging Endeavor

Yet the recent oil release in the Gulf of Mexico starkly and dramatically emphasizes that the environmental impacts of oil use remain a vexing problem. Addressing the transportation sources of climate change, in particular, is a challenging and complicated endeavor—climate change is possibly the greatest environmental and social challenge worldwide. Nonetheless, previous success in mitigating environmental problems instills a confidence that the transportation sector can reduce its significant contributions to climate change.

GHG emissions accumulate in the atmosphere; reducing emissions therefore offers the best strategy for preventing the buildup of GHGs to levels that pose a major risk to human and natural systems. Significantly reducing GHG emissions from transportation will require actions that go beyond increasing vehicle fuel efficiency and that encompass initiatives in all of the major passenger and freight modes.

Transportation GHG emissions consist largely of CO2 from petroleum combustion (93 percent of emissions) but also include non-CO2 emissions of methane and nitrous oxide from fuel combustion, as well as hydrofluorocarbons from vehicle air conditioning units—see Table 1. Globally, the transportation sector is responsible for 23 percent of energy-related GHG emissions, with approximately three-quarters from road vehicles (2). In the United States, the transportation sector produces 34 percent, reflecting the higher per capita consumption of carbon-based fuels compared with the rest of the world (see Figure 1). Transportation also exerts an indirect effect on climate change by inducing land use changes in agriculture, settlement patterns, housing, and business locations.

The National Indian Justice Center is located in Santa Rosa, California. NIJC’s building also houses the administrative offices of the California Indian Museum and Cultural Center, the Intertribal Court of California and the Regional Tribal Justice Center. Construction is currently underway for the California Indian Museum and Cultural Center, which will include a storytelling venue, Native plants garden, California Indian foods, a small Native village, audio-visual displays that highlight California Indian history and the contributions of California Indians, as well as Edward Curtis prints and traveling exhibits. If you are in the area, please come visit and tour the facilities.

The FHWA Office of Safety, in cooperation with Federal, State, and local stakeholders, has developed a one-day workshop for improving the physical factors of local and rural roadways that may contribute to crashes. Road Safety 365: A Workshop for Local Governments was developed incorporating notable adult learning approaches for conveying information and conducting exercises. It is designed to provide local and rural agencies with practical and effective ways to incorporate safety solutions into daily activities and the project development process.

Using examples, case studies, and hands-on activities, the course demonstrates how to integrate safety solutions into rural and local transportation projects at all stages of the project development process - planning, design, construction, implementation, operations, and maintenance. The course provides practical guidance in identifying road safety issues and implementing low-cost countermeasures. It also presents the benefits and potential cost savings of integrating safety improvements into daily operations and maintenance activities - not just on an occasional basis, but 365 days a year.

The Road Safety 365 workshop audience ranges from decision-makers to road crews. It is aimed primarily at local and rural road and public works supervisors. Others who would benefit from this training include: elected officials, public safety advocates, State Department of Transportation personnel, law enforcement, consultants, regional and rural development organizations, municipal associations, town safety committees, local planning commissions, metropolitan/rural planning organizations, university extension offices, and Local Technical Assistance Program (LTAP) and Tribal Technical Assistance Program (TTAP) personnel. After completing the workshop, participants should be able to identify safety issues on their road network and the countermeasures and available resources to address them.

This one-day workshop was developed for LTAP and TTAP Center delivery to local practitioners. Demonstrating how personnel who adopt a safety attitude/culture in performing their duties can have a significant impact on making their roadways safer, the workshop is divided into nine modules that cover all aspects of improving safety on rural roadways.

For additional information about this workshop, please contact Rosemarie Anderson at rosemarie.anderson@dot.gov. Contact your local LTAP or TTAP for a schedule of workshops.
Body of Evidence

This issue of TR News May-June 2010 brings together leading experts to provide an overview of transportation’s role in GHG buildup and in energy use. Several articles highlight recent reports published by the Transportation Research Board and by other units of the National Research Council (NRC). NRC is releasing reports in two series, America’s Energy Future and America’s Climate Choices, that present the perspective of all the major energy-consuming sectors.1

As explained in the NRC reports summarized in this issue, a strong and credible body of evidence documents that the earth is warming and that this warming is caused largely by human activities, especially through the release of GHGs from the burning of petroleum and other fossil fuels. Many models of emissions trends and climate risks indicate that GHG emissions may need to be reduced worldwide by 50 to 80 percent—perhaps by even more—by the middle of this century. To achieve these deep reductions will require actions that cut across all energy-using sectors to effect a marked departure from the current trajectory of increasing emissions, as one of the new NRC reports makes clear.

Mix of Transportation Strategies

The article1 by Fulton notes that no single transportation technology or policy action offers a promising means of achieving such deep reductions; instead, a mix of different technologies, policies, and strategies is necessary. The mix likely will involve sustained increases in the fuel economy of all kinds of vehicles, switching to fuels with lower GHG emissions per mile, and reducing the demand for energy and emissions-intensive transport services, with a range of actions from shifting modes to changing urban form.

The spectrum of actions includes the deployment of intelligent transportation systems that improve operational efficiency (see article1 by Barth and Boriboonsomsin), and public policies that promote less energy-intensive patterns of land use (see article1 by Gómez-Ibáñez and Humphrey). As Frankel and Menzies point out, these outcomes require many well-informed and complementary policy choices. Because CO2 emissions from transportation are roughly proportionate to the amount of petroleum consumed, the price of gasoline, diesel, and alternative fuels can affect emissions through fuel demand and supply. Despite recent spikes in the price of petroleum, however, U.S. transportation fuel costs have been relatively low. The low price, along with rising incomes, has favored heavier and larger personal vehicles that tend to use more fuel and produce greater quantities of GHG emissions.

Regulatory Approaches

To counter this, the U.S. government has taken several actions. For example, federal tax incentives and other policy initiatives are spurring the introduction of vehicles with battery-powered electric drives. As explained by Turrentine, this poses many challenges, including integration with the electricity infrastructure. In addition, the U.S. Environmental Protection Agency and the National Highway Traffic Safety Administration have promulgated new performance regulations to increase the fuel economy of cars and light trucks and to reduce vehicle emissions of GHGs, including substances besides CO2 (see article1 by Noland).

At the state level, California is pioneering an approach to control GHG emissions by regulating fuels, seeking to spur the development and use of low-carbon fuels such as advanced biofuels. In his article, Sperling explains California’s low carbon fuel standard, which accounts for the total emissions from fuels, from production to consumption, to achieve net GHG reductions—a critical challenge for all mitigation policies.

Modal Initiatives

Freight activity and its modal distribution also may need to change substantially, depending on progress in boosting energy efficiency and diversifying the energy supply, especially in the trucking sector (see article1 by Mintz). The international maritime sector, instrumental in providing cheap transportation for global trade,
emits as much CO2 as some of the world’s most prosperous countries—and therefore is becoming a target of policy interventions, as discussed by Corbett, Winebrake, and Wang.

The aviation sector is becoming a major contributor to transportation emissions globally, and international efforts to control emissions are under way. Aviation depends on liquid fuels with a high energy content, prompting research to develop biofuels for this vital and safety-conscious sector (see article\(^3\) by Anger and Putnam).

**Opportunities for Innovation**

The research challenge is beginning, with many issues needing more informed and careful analysis, as Meyer and Godwin point out\(^3\). Meeting the challenge of climate change will provide opportunities for innovation—extensive and intensive innovation in technologies, practices, and policies. Although this issue of TR News can cover only a sample of the needs for research and innovation, the articles reflect the importance of a large, varied, and vibrant transportation research community going forward.

**Acknowledgments**

Members of several TRB committees were instrumental in developing, assembling, and reviewing the articles in this issue of TR News, including the TRB Special Task Force on Climate Change and Energy, the Transportation Energy Committee, the Alternative Transportation Fuels and Technology Committee, the Climate Change Joint Subcommittee, and the Transportation and Sustainability Committee. Appreciation is expressed to TRB Senior Program Officer Thomas R. Menzies, Jr., for his work with the committee chairs and authors and with TRB senior staff and the magazine’s editorial board in shaping the final content of this issue.

NEW TOOLKIT AVAILABLE TO ADVANCE ROAD SAFETY AUDITS (RSA) ON TRIBAL AND FEDERAL LANDS

The Federal Highway Administration (FHWA) defines an RSA as a "formal safety performance evaluation of an existing or future road or intersection by an independent, multidisciplinary team." RSAs have proven to be a leading tool for improving safety on and along roadways. As such, the use of RSAs has grown tremendously throughout the United States. A decade ago, few States had experience conducting RSAs; now each State has had some experience with the RSA process. To promote the use of RSAs by tribal governments and Federal Land Management Agencies (FLMAs), FHWA has provided training and technical assistance and has led RSAs for tribal governments and FLMAs, including the U.S. Forest Service, National Park Service, U.S. Fish and Wildlife Service, and Bureau of Land Management.

The implementation of RSAs for tribal governments and FLMAs showed that these partners often face unique conditions, staffing, and funding constraints that do not allow needed resources to be devoted to improving roadway safety. In order to advance implementation of RSAs on tribal and Federal lands, the FHWA Office of Federal Lands and FHWA Office of Safety partnered to develop the RSA Toolkit for Tribal Governments and FLMAs.

The toolkit is intended to assist tribal governments and FLMAs to use RSAs to address their safety issues. It provides information about identifying an RSA champion, building supportive partnerships, identifying available funding sources for an RSA program and improvements, outlining tools to conduct RSAs, and identifying resources to examine safety issues and select countermeasures.

The toolkit provides worksheets and other sample materials to facilitate parts of the RSA process - requesting assistance, scheduling an RSA, analyzing safety data, conducting field reviews, and documenting issues and suggestions. The toolkit also includes examples of programs and of similar agencies' experiences to highlight successes and struggles in implementing RSAs and improving safety for all road users. According to John Baxter, Associate Administrator for the FHWA Office of Federal Lands Highway, "Our case studies have shown that RSAs are an effective tool for improving safety on our Federal and tribal lands. The RSA toolkit will help Federal agencies and tribes institutionalize their use. We are looking forward to hearing some of the success stories that are likely to come out of this effort."

The new toolkit is available now and can be downloaded from the Office of Safety website: http://safety.fhwa.dot.gov/rsa/resources/toolkitflh/
TRIBAL ROAD FATALITIES SOAR WHILE FUNDING LAGS

Road fatalities in Indian Country are three times the national average because road projects in these areas are inadequately funded, tribal leaders told federal officials earlier this fall.

In a field hearing of the Senate Indian Affairs Committee in Polson, Montana, committee representative Sen. Jon Tester, D-Mont <http://www.whorunsgov.com/Profiles/Jon_Tester> heard from government officials and tribal representatives from as far as California and Arizona who said more money was needed for reservation roads and the system needed to be better administered.

Some 73 percent of the 28,000 miles of roadways under the Bureau of Indian Affairs are unpaved and considered inadequate, Assistant Secretary of Indian Affairs Larry Echo Hawk said. While road fatalities across the nation are going down, such deaths in Indian Country are skyrocketing. The annual fatality rate on Indian roads is three times the national average, said John Baxter of the Federal Highway Administration.

“Why have fatalities increased? Because the funding is not coming,” said Timothy Rossette, environmental health chief of the Chippewa-Cree Tribe of Montana. The $450 million annual Indian Reservation Roads Program covers 126,000 miles of roads, including the 28,000 miles covered by the BIA.

Several tribal representatives told Tester, that the formula to split the funding between the tribes is too complicated and the criteria in which roadways can be included varies widely from region to region. They said that because the funding formula includes vehicle miles traveled, tribes in urban areas often include interstates and other relatively heavily traveled roadways in the inventories they submit as a way to get more money. As a result, rural tribes often get a tiny piece of the pie for reservations that often have much worse infrastructure problems than their urban counterparts, tribal members representing those areas. All it would take is an administrative fix, not an act of Congress. “It comes down to what’s right and what’s wrong, and what’s going on is wrong,” Rossette said.

But there is disagreement between the tribes on how to fix it. Tribal representatives from Montana, Wyoming and the Dakotas implored the federal government to simplify the funding formula. John Smith, transportation director of Wyoming’s Eastern Shoshone and Northern Arapaho Tribes, said the funding allocation should be based on population and miles of road instead of vehicle miles traveled. Other tribes say they have been unjustly vilified. Jacque Hostler, a transportation official representing the North Coast Tribal Chairmen’s Association and 110 tribes in California, said tribes in her state have been mischaracterized. “California should not be judged as building roads to Disneyland,” she said. “While there are a handful of urban tribes with large casinos located on or near interstates, there are thousands of tribal dirt and gravel and unimproved roads that provide access to tribal reservations, villages and communities.”

Lyle Deere, Vice President of the Intertribal Transportation Association (ITA) and Transportation Planner for the Osage Nation Roads Department said, “It seems there is a reservation position to return the IRR program to what it was intended, reservation only. My contention is the IRR Program has evolved to include all of Indian Country, not just a portion.”

Future of Q10 ~

Echo Hawk said federal officials have held 10 listening sessions in different parts of the country on what should be done with the funding formula, but there has not been consensus. The BIA and the Federal Highway Administration have proposed changing how roadways are classified in the funding formula, but more work has to be done for that proposal to gain acceptance, officials said.

Mike Black, Director, Bureau of Indian Affairs and Leroy Gishi, Chief, Division of Transportation, Bureau of Indian Affairs were both in attendance at the National Tribal Transportation Conference in Albuquerque, NM. Both noted that the comments from the Q10 consultation meetings are in the review process. Gishi also explained that 2011 would be a transition year for Q10, with final impacts not being realized until FY 2012.

Extension of SAFETEA-LU ~

Meanwhile, the U.S. House of Representatives recently voted to extend federal highway and transit funding in the form of a continuing resolution for another nine months, running from January 1, 2011-September 20, 2011. The measure was part of a $1.2 trillion federal spending bill, which will now head to the Senate for approval. This continuing resolution is the latest in a series, which have been enacted to keep transportation spending afloat since SAFETEA-LU (Safe, Accountable, Flexible, Efficient Transportation Equity Act) expired on September 30, 2009.

(Continued on page 32)
In the recently-published report to President Barack Obama on “Solving the Problem of Childhood Obesity within a Generation,” the susceptibility of Native American/Alaskan Native children to childhood obesity and related diseases, such as juvenile diabetes, is given special attention. A study of four year-olds found that obesity is more than two times more common among Native American/Alaskan Native children (31%) than among white (16%) or Asian (13%) children. This rate is higher than any other racial or ethnic group studied. In 2002, more than 100,000 Native American and Alaskan Native adults, or nearly 15 percent of those receiving care from the Indian Health Service (IHS) were estimated to have diabetes.

Indian country comes in various forms, from rural reservation communities to urban dwellers and remote Alaskan villages to Oklahoma’s Tribal areas. Elected Tribal leaders and other community leaders such as school officials have the ability to spur action in the areas of health, wellness, nutrition and physical activity. Throughout our country’s history, Native communities have provided some of the best examples of healthy food and sustainable community-based practices and many groups in Indian country are continuing to lead by example by following traditional paths that have existed long before the country was born.

Given the magnitude of the crisis, an interagency collaboration between the First Lady’s Let’s Move! Initiative, the Departments of the Interior (AS-IA, Bureau of Indian Affairs, and Bureau of Indian Education), Agriculture, and Health and Human Services (IHS) to reduce disproportionately high obesity rates and improve the health of Native youth has been formed. Through concrete policy changes called for in the President’s Childhood Obesity Task Force Report targeted actions will be taken to improve access to healthier foods and increase physical activity in BIE and public schools as well as addressing prenatal and very early childhood care in the IHS hospital system.

Our goals for Let’s Move Indian Country are as follows:

- **Creating a Healthy Start on Life**
  Certify All Federally-Run HIS Obstetrics Facilities as Baby Friendly Hospitals by 2012.

- **Creating Healthier Schools**
  Increase the number of schools serving high populations of Native youth that meet the Healthier US School Challenge criteria by 2012.
  Increase the number of targeted schools and afterschool programs accessing Child Nutrition Programs. Support school transformation efforts at 5 pilot schools in the Bureau of Indian Education.

- **Increasing Access to Healthy, Affordable Food**
  Develop school/community gardens throughout Indian Country utilizing USDA programs or Technical Assistance.

- **Increasing Physical Activity**
  Engage 50,000 people in Indian Country in the President’s Active Lifestyle Award (PALA) program by 2012.

- **Creating Healthy, Comprehensive Food Systems Policies**
  Certify All Federally-Run IHS Obstetrics Facilities as Baby Friendly Hospitals by 2012.

Government alone will not be able to solve this problem, we need your help, expertise, and commitment on the ground. This movement looks to recognize the already existing efforts in Indian country and then identify areas where public/private sector partnerships can support. Let’s Move in Indian Country recognizes the inherent sovereignty of each of these communities and wishes to work with each individual community to reduce childhood obesity and health related illnesses. Here are some existing programs and resources that individuals and communities can access to begin or enhance their work toward the goal of ending childhood obesity within a generation.

The LMIC initiative is led by Dr. Susan Karol, Chief Medical Officer for the Indian Health Service, who can be reached at susan.karol@ihs.gov or (301) 443-1083.
RECENT TRANSPORTATION LEGISLATION

This information is provided expressly for educational purposes. The CA/NV TTAP hopes to inform and educate tribal communities about legislation that may impact California and Nevada tribal communities and their tribal transportation programs. The following legislation was current at the time of publication. Legislation may change or be repealed. For further information, please check the status of the legislation at the respective website sources noted below.

Due to the overwhelming number of pending transportation related bills in the California, Nevada, and Federal Legislatures we have created a downloadable file on the NIJC Website that lists each bill, the sponsor, the status, and a brief summary.

To view and download the file go to: [http://www.nijc.org/ttp_legislation.html](http://www.nijc.org/ttp_legislation.html)

Presidents Signature Extends Highway and Transit Programs for 7 Months
From the AASHTO Journal

President Barack Obama signed into law a measure that extends until Sept. 30 federal highway and transit programs that had been slated to expire tonight. The seven-month extension averts a suspension of reimbursements from the U.S. Department of Transportation to the states for their ongoing surface transportation improvement projects, as occurred last March when a similar extension was delayed, and allows states to continue to commit projects just in time for the construction season to begin in earnest.

The new law extends until the end of this federal fiscal year the 2005 highway and transit authorization law – the Safe, Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users, commonly known as "SAFETEA-LU." Expenditure authority for the Highway Trust Fund would also continue through Sept. 30. This is the seventh short-term extension of SAFETEA-LU, which expired Sept. 30, 2009.

A video of Secretary LaHood's remarks is available at [bit.ly/LaHoodAASHTO0302](http://bit.ly/LaHoodAASHTO0302). LaHood also posted a blog entry Wednesday on his remarks at the Washington Briefing.

A video of House Transportation and Infrastructure Committee Chairman John Mica, R-Florida remarks is available at [bit.ly/MicaAASHTO0302](http://bit.ly/MicaAASHTO0302)
Please visit the National Indian Justice Center web site to view more upcoming transportation events. Go to: [www.nijc.org/ttap_events.html](http://www.nijc.org/ttap_events.html)

### APRIL 2011

April 4-9  
**NATIONAL WORKZONE AWARENESS WEEK**

April 10-13  
**2011 APWA North American Snow & Pacific Northwest Snow-fighters Conference**  
Spokane Convention Center  
Spokane, WA

### AUGUST 2011

August 1-4  
**National LTAP/TTAP Annual Conference**  
Park Plaza Hotel  
Boston, MA  
TRIBAL TRANSPORTATION PARTNERS DIRECTORY

FEDERAL

Federal Highway Administration
United States Department of Transportation
1200 New Jersey Ave, SE
Washington, DC 20590
http://www.fhwa.dot.gov/index.html

Federal Highway Administration (FHWA) is charged with the broad responsibility of ensuring that America’s roads and highways continue to be the safest and most technologically up-to-date. Although State, local, and tribal governments own most of the Nation’s highways, FHWA provides financial and technical support to them for constructing, improving, and preserving America’s highway system.

Central Federal Lands Highway Division
Federal Highway Administration
12300 West Dakota Ave.
Lakewood, CO 80228
(720) 963-3500
http://www.cflhd.gov/index.cfm

The Central Federal Lands Highway Division (CFLHD) operates as part of the Federal Lands Highway Program, serving the needs of all central states. CFLHD actively administers the surveying, designing and constructing of forest highway system roads, parkways and park roads, Indian reservation roads, defense access roads, and other Federal lands roads. CFLHD also provides training, technology, deployment, engineering services, and products to other customers.

Office of Federal Lands Highway
Federal Highway Administration
1200 New Jersey Avenue, SE
Washington, DC 20590
(202) 366-9494
http://www.fhwa.dot.gov/flh/index.htm

The Office of Federal Lands Highway (FLH) provides program stewardship and transportation engineering services for planning, design, construction, and rehabilitation of the highways and bridges that provide access to and through federally owned lands.

The primary purpose of the FLHP is to provide financial resources and technical assistance for a coordinated program of public roads that service the transportation needs of Federal and Indian lands.

Federal Transit Administration
1200 New Jersey Avenue, SE
4th & 5th Floors East Building
Washington, DC 20590
http://www.fta.dot.gov/

FTA Region 9 Offices
Federal Transit Administration
201 Mission Street Suite 1650
San Francisco, CA 94105

Federal Transit Administration (FTA) is one of 10 modal administrations within the U.S. Department of Transportation. Headed by an Administrator who is appointed by the President of the United States, FTA administers federal funding to support a variety of locally planned, constructed, and operated public transportation systems throughout the U.S., including buses, subways, light rail, commuter rail, streetcars, monorail, passenger ferry boats, inclined railways, and people movers.

Rural Transit Assistance Program (RTAP)
The mission is to address the needs of rural, small urban and tribal transit operators across the nation.

National Local Technical Assistance Program Association (NLTAPA) is a not-for-profit organization representing and serving the 58 LTAP and TTAP Member-Centers in the United States and Puerto Rico. All staff of Member-Centers are entitled to Association services and opportunities to Serve. www.nltapa.org

Bureau Of Indian Affairs
There are millions of acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 561 federal recognized tribal governments in the United States. Developing forestlands, leasing assets on these lands, directing agricultural programs, protecting water and land rights, developing and maintaining infrastructure and economic development are all part of the agency's responsibility. In addition, the Bureau of Indian Affairs provides education services to approximately 48,000 Indian students.

Work Zone Mobility and Safety Program
Work Zone Training Compendium
The U.S. Federal Highway Administration has released a
compendium of information on available work zone training
and guides.
To view the training program go to:
http://www.ops.fhwa.dot.gov/wz/outreach/wz_training/
index.htm

Roundabouts
Roundabouts are circular intersections. Roundabouts reduce
traffic conflicts (for example, left turns) that are frequent
causes of crashes at traditional intersections. Unlike a traffic
circle or a rotary, a roundabout’s incoming traffic yields to
the circulating traffic
For more information visit the website at:
http://safety.fhwa.dot.gov/intersection/roundabouts/

Roadway Worker Safety Website
The U.S. Federal Highway Administration’s Office of Op-
erations has launched a new page on its Work Zone Safety
website designed to be a central source of data and links to
information and technical resources on roadway worker
safety.
To visit the website go to:
http://www.ops.fhwa.dot.gov/wz/workersafety/index.htm

Training, Tools, Guidance and Countermeasures for Locals
Local and Rural team is continuously looking for new ways
to meet the needs of local and rural road owners and opera-
tors. Insuring that tools meet the needs of the users and that
they have the resources and training they need to effectively
use the tools is a critical part of the solution.
To visit the web site go to:
http://safety.fhwa.dot.gov/local_rural/training/

Local & Rural Road (LRR) Safety Peer-to-Peer (P2P) Pro-
gram

TRANSPORTATION PROGRAMS AND DEVELOP-
MENT

FHWA Resource Center
The Mission to: advance transportation technologies and
solutions through training, technical assistance, technology
deployment, and partnerships.
For more information go to:
http://www.fhwa.dot.gov/resourcecenter/

The FHWA has developed an extensive list of resources that
focus specifically on the latest culvert technology. To view
this list go to: http://nijc.org/datasheets/.ttap/
TTAP_Resourcelist.asp

National Highway Institute (NHI) - 2010
The NIH in partnership with the Transportation Curriculum-
Development Council has developed a number of FREE
web-based trainings that can be completed in one, two, or
three hours. Whether you are working in the field, have lim-
ited time for training, or just want to expand your skill set on
TRIBAL TRANSPORTATION RESOURCES

a specific topic these web-based courses provide an ideal way to enhance your knowledge on key areas. To view the list of available courses go to: https://www.nhi.fhwa.dot.gov/home.aspx

TCCC HMA Paving Field Inspection
NHI Course 131129 Web-based Training
This course will explain the important tasks involved in HMA paving and describe the proper procedures for executing them.
This training is recommended for TCCC Levels I, II, and III. 4.5 Hours FREE
To register for the course go to: http://www.nhi.fhwa.dot.gov/Home.aspx

TCCC Plan Reading Series
NHI Course 134108 Web-based Training
The ability to read plans is essential for anyone involved in highway and/or bridge construction. This training contains modules covering both basic plan reading instructions, as well as in-depth instruction for those seeking more information on and/or a review of highway plan reading.
8.0 Hours CEU: 0 Fee: FREE
For more information go to: http://fhwapap07.fhwa.dot.gov/training/course_detail.aspx?num=FHWA-NHI-134108&cat=t&num=134

TCCC Flagger Training
NHI Course 133118 Web-based Training
This course is a basic training and is designed for those learning the first steps in performing flagger duties. The training provides flaggers with a better understanding of the importance of their flagging duties on a project. This training does not cover individual State flagger training or certification requirements. For more information on your State’s flagger training requirements, contact your State’s safety office.
1 hour CEU: 0 Fee: FREE
For more information go to: http://gallery.mailchimp.com/fcf27858b524e94e746bc5dce/files/133118.pdf

TCCC Maintenance of Drainage Features for Safety
NHI Course 380108 Web-based Training
Module 1, Effects of Drainage, describes common roadway safety hazards and how to recognize drainage problems.
Module 2, Safe Drainage Features and Work Zones, covers solutions to common roadway safety issues and work zone safety.
1 hour CEU: 0 Fee: FREE
For more information go to: http://gallery.mailchimp.com/fcf27858b524e94e746bc5dce/files/380108.pdf

National Highway Institute (NHI).

The Office of Real Estate Services will present the ROW and OAC core training modules to a large audience, nationwide. You are welcome to invite State, local, other Federal, and other FHWA staff to join you in your Division office conference room for training. We will cover the basics of the ROW and OAC program requirements, in approximately 18 to 20 web conference sessions, lasting 2 hours each to be held each Tuesday from January 4 through May 31, 2011. You can sign-up for some presentations and not others.
We requested Web conferencing capability for 150 sites on Tuesdays from 1:00 to 3:00 eastern, starting January 4. This training will provide introductory and basic training, prior to the 2011 PEAR 2, providing us more flexibility to develop the Right-of-Way Boot Camp for PEAR 2.
If you have questions, email Kathy Facer at: Kathleen.facer@dot.gov

Office of Professional and Corporate Development (OPCD)
For more information go to: http://www.fhwa.dot.gov/opd/

National Transportation Training Resource (NTTR)
The National Transportation Training Resource (NTTR) is an online database of information about learning resources for the public-sector transportation workforce. The NTTR is a tool for training managers and frontline transportation professionals.
To visit the website go to: http://www.nttr.dot.gov/

FHWA Wildlife Vehicle Collision Reduction Study Training Course
A national study was conducted on the causes and impacts of wildlife vehicle collisions (WVCs). This study also provides recommendations and solutions for reducing these collisions.
To view the course go to: www.environment.fhwa.dot.gov/WVCtraining/index.asp

National Cooperative Highway Research Program (NCHRP)
Report 667
Model Curriculum for Highway Safety Core Competencies presents course materials, including the instructor’s guide and student workbook, for a fundamental highway safety training course. The course is designed to address the core competencies highway safety practitioners should have or acquire. An accompanying CD-ROM includes a brochure and short Microsoft PowerPoint presentation for marketing the training course.
To view the report go to: http://onlinepubs.trb.org/onlinepubs/nchrp/nchrp_rpt_667.pdf
The following are the most recent publications received and entered into the National Indian Justice Center (NIJC) data base. The NIJC web site has the complete list of publications going back several years. To view the Tribal Transportation (TTAP) Resources data base go to: http://nijc.org/datasheets/ttpap/TTAP_Resourcelist.asp

U.S. DOT-FHWA

National Resources Conservation Service (NRCS) Roadside Weed Management
The new reference features a state-by-state analysis of noxious weed law for all land managers. It also offers expert essays on the issues common to the "war on weeds" waged by all federal, State, and local agencies across the country.
Copies may be ordered directly from the FHWA warehouse by faxing your request for Pub. No. FHWA-HEP-07-017 to:
(301) 386-5394, attention -- Johnny Booze.

FHWA Road Safety Audit Guidelines
FHWA-SA-06-06
The primary purpose of this guideline is to provide a foundation for public agencies to draw upon when developing their own Road Safety Audit (RSA) policies and procedures and when conducting RSAs within their jurisdiction.
To view the guide go to: http://safety.fhwa.dot.gov/rsa/guidelines/documents/FHWA_SA_06_06.pdf

Highway Safety Information System Brochure
A brochure that describes the Highway Safety Information System, which is a roadway–based system that provides data on accident, roadway, and traffic variables.
For more information go to:

Safety Evaluation of the Safety Edge Treatment
A summary of a report that explores the safety impact of safety edge treatments. The treatments are designed to minimize pavement-shoulder drop-off crashes.
For more information go to:

Road Safety Audit Toolkit for Federal Land Management Agencies and Tribal Governments
FHWA-FLH-10-0011
The FHWA has included the RSA as one of it’s nine proven safety countermeasures.. FMLAs and Tribes often face unique conditions, staffing, and funding constraints that do not allow resources to be devoted to improving roadway safety. This RSA Toolkit is intended to be used by FMLAs and Tribes to overcome these obstacles.
To download the toolkit go to:

TRIBAL TRANSPORTATION RESOURCES

PROGRAMS AND DEVELOPMENT (Continued)

CA/NV TTAP and National Highway Institute
The CA/NV TTAP can work with the National Highway Institute to bring classroom and/or webinar training to your community. You may also request training specifically from NHI (see the message below). Check out the NHI catalog using the link below and let us know the Title and NHI coding number for any training that you are interested in and we will work to get it scheduled in your area.

LTAP/TTAP Academy
The goal of the Academy is to provide both new and current LTAP/TTAP staff with a broad overview of the national program and opportunities for continued professional development. For more information go to:
http://www.ltapt2.org/resources/

Southwestern Indian Polytechnic Institute
National Indian Community College and Land Grant Institution serving American Indian and Alaskan Native students.
For more information go to:
http://www.sipi.edu/

University of California, Berkeley, Institute of Transportation Studies.
Technology Transfer Program
California LTAP Center
To visit the website go to:

TRIBUTAL TRANSPORTATION RESOURCES

http://safety.fhwa.dot.gov/rsa/resources/toolkitflh/

Maintenance Services and Surface Weather
Journal of the Transportation Research Board, No. 2169
Contains 19 papers that explore variable speed limit systems in work zones, the safety of mobile lane closures, temporary rumble strips for short-term work zones, the joint merge in construction zones, real-time measurement of travel time delay in work zones, short-term speed limit devices in work zones, simulation models for assessing the impacts of highway work zone strategies, and estimating operational impacts of freeway work zone extended facilities.
To view the report go to:
http://trb.metapress.com/content/uu1637756535/?p=08c9e2264aae472dafe60fc62b12035d&pi=9

Operational Effects of Geometrics and Access Management
2010
Journal of the Transportation Research Board, No. 2171
Contains eight papers that explore acceleration and deceleration zones at traffic control intersections, using Global Positioning System data to model operating speed and deceleration on two-lane rural roads, interchange treatments to preserve service life of narrow overpass and underpass roadways, parallel flow intersection and displaced left-turn intersection designs, offset improvements for left-turn lanes, public transit provisions in a state highway access management code, safety impacts of access management features in the Las Vegas, Nevada, Valley, and access management at major arterial intersections.
To view the report go to:
http://trb.metapress.com/content/p51t261q1541/?p=2c5b9256cf4e4bb8054e17ed373f334&pi=4

Transit 2010, Volume 1
Journal of the Transportation Research Board, No. 2143
Includes 21 papers that explore network connectivity; bus schedule adherence; soft costs in major fixed guideway projects; data-processing framework for transit performance analysis; referenda and funding options; subway productivity, profitability, and performance; bus dwell time; short headway transit services; and travel time variability on bus rapid transit systems.
To view the report go to:

Highway Safety: Planning; Young Drivers; Older Drivers; Indian Nations; Roundabouts; Traffic Law Enforcement; and Trucks and Buses
Journal of the Transportation Research Board, No. 2078
Includes 18 papers that explore safety-conscious planning in midsize metropolitan areas, safety and accessibility effects of pay-as-you-drive strategies, driver injury severity causes in single-vehicle-deer crashes, road hazards detection by novice teen and experienced drivers, effect of passenger age and gender on fatal crash risks of young drivers, actual and perceived behavior of older drivers on freeways, and older driver behavior related to fatal crashes.
To View the report go to: http://trb.metapress.com/content/h141705t2m25/?p=10a9b5a46079487c9e025421d32b065a&pi=9

Highway Safety: Behavior, Management, and Roundabouts
Journal of the Transportation Research Board, No. 2182
Contains 18 papers that explore ways to monitor drinking, technology to tell novice drivers how to drive, driving and crash histories of illegal street racing offenders, seat belt use on school buses, and speed enforcement cameras.
To view the report go to: http://trb.metapress.com/content/t8327l7p2135/?sortorder=asc&p_o=0

Information Systems, Geographic Information Systems, and Advanced Computing 2010
Journal of the Transportation Research Board, No. 2183
Contains 14 papers that explore origin-destination matrix generation; a household travel data simulation tool; an urban travel route and activity choice survey; augmenting transit trip characterization and travel behavior comprehension; improving data quality, accuracy, and response in on-board surveys; and assessing the quality of origin-destination matrices derived from activity travel surveys.
To view the report go to:

Human Performance, Simulation, and User Information Research
Journal of the Transportation Research Board, No. 2185
Contains 10 papers that explore driver response to adaptive lane departure warning system, changes in spatial attention with dual-task driving, characterization of longitudinal driving behavior, characterizing individual driver response to yellow change interval at signalized intersections, driving simulator study of steering adaptation patterns, simulator fidelity and validity in a transfer-of-training context, effect of simulator motion cuing on steering control performance, safety effectiveness of advance street name signs, roadway guide signs at an international airport, and modeling travelers’ responses to incident information provided by variable message signs.
To view the report go to: http://trb.metapress.com/content/jnk864271133/?p=3282886e48ec444cbeb77f309cc660b8d&pi=17

Bicycles 2010
Journal of the Transportation Research Board, No. 2190
Contains 6 papers that explore the influence of the built environment on route selection for bicycle and car travel; automated bicycle counts; multimodal travel choices of bicyclists; effects of gender on commuter cycling and accident rates; on-street bicycle facility configuration effects on bicyclist and motorist behavior; and parking lane width effect on bicycle operating space.
To view the report go to: http://trb.metapress.com/content/q133866m3338/?p=333555389e1e44d6b7472e0a3a27665b&pi=4

Traffic Signal Systems 2010
Journal of the Transportation Research Board, No. 2192
Contains 18 that explore simulation-based optimization of the maximum green setting, wireless magnetometer vehicle detectors at signalized intersections, management of signalized arterial capacity, arterial signal coordination, crosswalk detection in loop detectors at signalized intersections, railroad-preempted intersections, and providing automated performance measures at signalized intersections with existing video detection equipment.

Vehicle Safety; Truck, Bus, and Motorcycle
Journal of the Transportation Research Board, No. 2194
Contains 13 papers concerned with the safety of trucks, buses and motorcycles.
To obtain a copy of the report go to: http://trb.metapress.com/content/q8v524012h51/?p=4ab44cdf3bf84e40955f43916907ac21&pi=8
TRIBAL TRANSPORTATION RESOURCES

Research and Education 2010
Journal of the Transportation Research Board, No. 2199
Contains 6 papers that explore student understanding of sight distance in geometric design, learning styles in an engineering laboratory, design of transportation curriculum materials with examples, traffic control game for teaching high school students, outsourcing decision making in a department of transportation, and performance measures for road infrastructure research programs.
To view the report go to:
http://trb.metapress.com/content/r4580260u745/?p=2dc70a547e544ad9a97dbf429422a0b0&pi=3

Highway Design 2010
Journal of the Transportation Research Board No. 2195
Contains 18 Papers
To view the report go to:
http://trb.metapress.com/content/u475w1g33282/?p=7c8de05863994903a7867fec10582cce&pi=7

Pedestrians 2010
Journal of the Transportation Research Board, No. 2198
Contains 17 papers concerned with the following aspects of pedestrians: incorporating bicycle and pedestrian topics in university transportation courses; high-visibility school crosswalks; safety effectiveness of leading pedestrian intervals; driver and pedestrian behavior at uncontrolled crosswalks; and many more.
For more information go to:
http://trb.metapress.com/content/u748hnq788v4/?sortorder=asc&p_o=10

Intelligent Transportation Systems and Vehicle–Highway Automation 2010
Journal of the Transportation Research Board, No. 2189
Contains 12 papers that explore real-time parking information, capability-enhanced probe vehicle surveillance system with vehicle-to-vehicle communications, in-vehicle and infrastructure-based collision warnings to nonviolating drivers, emergency response technology and an integrated active transportation system, and a rural variable speed limit system.
To view the report go to:

CALIFORNIA

NOTE: many of the listed transportation programs are dependant on the extension of SAFETEA-LU or the passage of the Re-authorization Transit Bill.

CALIFORNIA DEPARTMENT OF TRANSPORTATION (CALTRANS)

California Department of Transportation: Transportation Planning Funding Grants
The Transportation Planning Grants are intended to promote strong and healthy communities, economic growth, and protection of our environment. These planning grants support closer placement of jobs and housing, efficient movement of goods, community involvement, in planning, safe and convenient pedestrian and bicycle mobility and access, smart or strategic land use, and commute alternatives. The final results of these grants should lead to the adoption, initiation, and programming of transportation improvements that improve mobility, access and economic vitality.

For more information on these grants go to: http://www.dot.ca.gov/hq/tpp/grants.html

California Department of Transportation: The State-Legislated Safe Routes to School Program
California Safe Routes to School program is contained in the Streets & Highway Code Section 2330-2334. For more information on this program go to: http://www.dot.ca.gov/hq/LocalPrograms/saferoutes/sr2s.htm

Nevada Department of Transportation
Transportation Systems Projects
Project Submittal Program
A Transportation Improvement Project can increase roadway capacity (additional lanes); increase the safety of the roadway (right/left turn lanes, passing lanes, pull
outs); enhance an intersection (signals, stop signs, lighting); upgrade the roadway (realignment, reconstruction, overlay, drainage); or any other project that improves the roadway. Projects such as welcome and gateway community signs are eligible projects. Repair and reconstruction of bridges are also included. Primary reasons for a project can be safety issues, congestion relief, bridge repair/replacement, new development (both residential and commercial) or maintenance of the roadway.

Applications can be for projects located on or near federal/state highway or non-federal/state highway that has been given a functional clarification. Federal and State Agencies, Tribal governments, county, city and local governments, local public agencies or private non profits can apply.

**Dates:** Completed applications are due the first Monday in January (Tuesday if Monday is a holiday). Applications received after January will be held until the next Evaluation cycle in January the following year.

For information contact: Sandi Stanio, Program Development. (775) 888-7122, or e-mail: sstanio@dot.state.nv.us

**FEDERAL**

**DEPARTMENT OF TRANSPORTATION**

**Federal Safe Routes to School Program (SRTS)**

The Federal Safe Routes to School program (SRTS) was authorized by SAFETA-LU (the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users). This federal program has different eligibility and local match requirements than the state-legislated program. For more information on this program go to: [http://www.dot.ca.gov/hq/LocalPrograms/saferoutes/srts.htm](http://www.dot.ca.gov/hq/LocalPrograms/saferoutes/srts.htm)

**Federal Transit Administration**

**Public Transportation On Indian Reservations (FTA 5311)**

The goals of the Tribal Transit Program: 1) to enhance the access of public transportation on and around Indian reservations in nonurbanized areas to health care, shopping, education, employment, public services, and recreation; 2) to assist in the maintenance, development, improvement, and use of public transportation systems in rural and small urban areas; 3) to encourage and facilitate the most efficient use of all Federal funds used to provide passenger transportation in nonurbanized areas through the coordination of programs and services; and 4) to provide for the participation of private transportation providers in nonurbanized transportation to the maximum extent feasible.

For more information go to: [http://www.fta.dot.gov/funding/grants/grants_financing_3553.html](http://www.fta.dot.gov/funding/grants/grants_financing_3553.html)

**The Paul S. Sarbanes Transit in Parks Program**

Was established to address the challenge of increasing vehicle congestion in and around our national parks and other federal lands. America’s national parks, wildlife refuges, and national forests were created to protect unique environmental and cultural treasures, but are now facing traffic, pollution and crowding that diminishes the visitor experience and threatens the environment. To address these concerns, this program provides funding for alternative transportation systems, such as shuttle buses, rail connections and even bicycle trails. The program seeks to conserve natural, historical, and cultural resources; reduce congestion and pollution; improve visitor mobility and accessibility; enhance visitor experience; and ensure access to all, including persons with disabilities. Eligible recipients also include state, tribal, or local governmental authorities with jurisdiction over land in the vicinity of an eligible area acting with the consent of the FLMA. Eligible project areas include any federally owned or managed park, refuge or recreational area open to the general public, including: National Parks, National Wildlife Refuges; Bureau of Land Management recreational areas; Bureau of Reclamation recreational areas; and National Forests. Eligible projects may also include the communities and land surrounding these federal lands.

**National Park Service: Preserve America Grants**

Preserve America grants support planning, development, and implementation of innovative activities and programs in heritage tourism such as surveying and documenting historic resources, interpreting historic sites, planning, marketing, and training. Successful applicants will emphasize creative projects that promote and preserve the community's cultural resources. Successful projects will involve public-private partnerships and serve as models to communities nationwide for heritage tourism, education, and economic development.

Your project must fit one of the following categories:

- Research and Documentation
- Education and Interpretation
- Planning
- Marketing
- Training
TRIBAL TRANSPORTATION FUNDING RESOURCES

FUNDING (Continued)

Designated Preserve America Communities and Neighborhoods, State Historic Preservation Offices, Tribal Historic Preservation Offices and Certified Local Governments that have applied for Preserve America Community designation are all eligible to apply for Preserve America grants. Individuals, nonprofits, and for-profit businesses are not eligible for funding.

For more information go to:

FHWA

Surface Transportation Environment and Planning Cooperative Research Program

The STEP is the primary source of funds for FHWA to conduct research and develop tools and technologies to advance the state of the practice regarding national surface transportation and environmental decision-making. In FY 2010, FHWA sought partnerships that leveraged limited research funding in STEP with other stakeholders and partners in order to increase the total amount of resources available to meet the nation’s surface transportation research needs.

The proposed FY2011 STEP funding levels are subject to the completion of the FY2011 Department of Transportation (DOT) appropriations process. The anticipated FY2011 STEP research efforts are preliminary and subject to change. In FY 2010, STEP addressed national research priorities that included:

1. Conducting research to develop climate change mitigation and adaptation strategies;
2. Improving state of the practice regarding livability and the impact of transportation on the environment;
3. Developing and/or supporting accurate models and tools for evaluating transportation measures and developing indicators of economic, social, and environmental performance of transportation systems;
4. Developing and deploying research to address congestion reduction efforts;
5. Developing transportation safety planning strategies for surface transportation systems and improvements;
6. Improving planning, operation, and management of surface transportation systems and rights of way;
7. Enhancing knowledge of strategies to improve transportation in rural areas and small communities;
8. Strengthening and advancing State/local and tribal capabilities regarding surface transportation and the environment;
9. Improving transportation decision-making and coordination across borders;
10. Conducting research to promote environmental streamlining/stewardship;
11. Disseminating research results and advances in state of the practice through peer exchanges, workshops, conferences, etc;
12. Meeting additional priorities as determined by the Secretary; and
13. Refining the scope and research emphases through active outreach and in consultation with stakeholders.

The number of stakeholders with an interest in environment and planning research is enormous and diverse, including these three tiers:

Tier 1 - Federal Agencies and Tribes: There are at least a score of Federal agencies with strong interest in transportation planning and environmental programs including: the Departments of Commerce, Defense, Homeland Security, Agriculture, Energy, Interior (DOI) and Housing and Urban Development, the Environmental Protection Agency (EPA), and the Centers for Disease Control and Prevention (CDC).

Within each of these agencies, there are many discrete organizations/programs with an interest - e.g., National Park Service, U.S. Fish and Wildlife Service and Bureau of Land Management within the DOI. Within the US Department of Transportation (USDOT), FHWA partners with the Federal Transit Administration (FTA) on virtually all planning and environmental work, including research. The FHWA also coordinates with the Federal Railroad, Aviation, Research and Innovative Technology, National Highway Traffic Safety and Maritime Administrations, and with the Office of the Secretary of Transportation on Global Climate Change as well as other issues. There are over 500 federally recognized Native American Tribes, which have a major interest in research affecting their planning and environmental needs.

Field Testing, Marketing, and Crash Analyses for Mini-Roundabouts

Contract No. DTFH61-09-C-00027.

The objectives of the contract include before vs. after evaluation of 10 mini-roundabouts to be implemented in the United states. FHWA is looking for Agencies who are willing to fund and construct mini-roundabouts soon. The traffic operational effects of the mini-roundabouts will then be evaluated by the research team for the FHWA. Possible 100% Federal funding for constructing mini-roundabouts if approved through the state’s Highway Safety Improvement Program.
EDA’s mission is to lead the Federal economic development agenda by promoting innovation and competitiveness, preparing American regions for growth and success in the worldwide economy. In implementing this mission pursuant to the Public Works and Economic Development Act of 1965, as amended (42 U.S.C. § 3121 et seq.) (PWEDA), EDA advances economic growth by assisting communities and regions experiencing chronic high unemployment and low per capita income to create an environment that fosters innovation, promotes entrepreneurship, and attracts increased private capital investment.

Applications are accepted on a continuing basis and processed as received. December 15 for funding cycle 1; March 10 for funding cycle 2; June 10 for funding cycle 3; and September 15 for funding cycle 1 of FY 2012.

The Kodak American Greenways Program

Eastman Kodak Company, The Conservation Fund and the National Geographic Society team up each year to present the Kodak American Greenways Awards Program. One major element of the Program involves “seed” grant awards to organizations that are growing our nation's network of greenways, blueways, trails and natural areas.

The Program operated by The Conservation Fund invites land trusts, local governments, and other organizations to submit proposals for small greenway project grants. Funded projects typically advance one or more of the following Program goals:

- Catalyzing new greenway projects
- Assisting grassroots greenway organizations
- Leveraging additional money for conservation and greenway development
- Promoting use and enjoyment of greenways

OTHER FUNDING

Department of Commerce, Economic Development Administration
Economic Development Assistance Programs
-AND-
Planning and Local Technical Assistance Programs
The need for a new surface transportation authorization bill was expressed by Senator Barbara Boxer (D-Calif.) In a Senate Committee on Environment and Public Works hearing Boxer stated, “The next highway, transit and highway safety authorization provides an opportunity to take a fresh look at these programs and make the changes necessary to ensure our transportation system will meet America’s needs in the coming years.”

“Tester asked tribal leaders to identify their priorities for the next highway spending bill, which is expected to be introduced next year. Leaders were in agreement that more money should be allocated for Indian Country.

Jefferson Keel, president of the National Congress of American Indians, said reservations make up nearly 3 percent of federal roadways but get less than 0.5 percent of total federal highway funding. He said one way for Indians to receive a more equitable share would be for Congress to clarify the ability of tribes to collect fuel taxes on their lands.

“At the end of the day it’s a matter of setting the right priorities and crafting innovative and effective means to address them,” said Boxer.
