The President signed a new two-year transportation authorization into law in June. The new law provides to FTA an authorization level of $10.6 billion in FY2013 and $10.7 billion in FY2014. This new legislation brings about a number of changes to FTA programs that are outlined in FTA Administrator Peter Rogoff’s July 12 letter, which can be viewed at: http://www.fta.dot.gov/documents/MAP-21_Dear_Colleague.pdf.

The big change is that, under MAP-21, FTA will now provide a total of $30 million annually, of which $5 million will be distributed on a competitive basis and $25 million will be distributed as formula grants. For the past several years, FTA has provided $15 million annually on a competitive basis, so this represents a doubling of the Tribal Transit Program.

The following are two excerpts from the legislation that explain these changes:

“Moving Ahead for Progress in the 21st Century Act” or the “MAP–21”.

TITLE II—AMERICA FAST FORWARD FINANCING INNOVATION
DIVISION B—PUBLIC TRANSPORTATION
SEC. 20010. FORMULA GRANTS FOR RURAL AREAS.
§ 5311. Formula grants for rural areas
(c) APPORTIONMENTS.—
(1) PUBLIC TRANSPORTATION ON INDIAN RESERVATIONS.—Of the amounts made available or appropriated for each fiscal year pursuant to section 5338(a)(2)(E) to carry out this paragraph, the following amounts shall be apportioned each fiscal year for grants to Indian tribes for any purpose eligible under this section, under such terms and conditions as may be established by the Secretary:

(A)$5,000,000 shall be distributed on a competitive basis by the Secretary.

(B) $25,000,000 shall be apportioned as formula grants, as provided in subsection (j).

(j) FORMULA GRANTS FOR PUBLIC TRANSPORTATION ON INDIAN RESERVA-
TIONS.—
(1) APPORTIONMENT.—

(A) IN GENERAL.—Of the amounts described in subsection (c)(1)(B)—

(i) 50 percent of the total amount shall be apportioned so that each Indian tribe providing public transportation service shall receive an amount equal to the total amount apportioned under this clause multiplied by the ratio of the number of vehicle revenue miles provided by an Indian tribe divided by the total number of vehicle revenue miles provided by all Indian tribes, as reported to the Secretary;
The National Indian Justice Center is located in Santa Rosa, California. NIJC’s building also houses the administrative offices of the California Indian Museum and Cultural Center, the Intertribal Court of California and the Regional Tribal Justice Center. Construction is currently underway for the California Indian Museum and Cultural Center, which will include a storytelling venue, Native plants garden, California Indian foods, a small Native village, audio-visual displays that highlight California Indian history and the contributions of California Indians, as well as Edward Curtis prints and traveling exhibits. If you are in the area, please come visit and tour the facilities.

President Obama Signs
Proclamation Designating Chimney Rock as a National Monument

Press release from the USDA

President Obama signed a proclamation establishing Chimney Rock as a National Monument. Chimney Rock, located in the San Juan National Forest in southwestern Colorado, offers a spectacular landscape rich in history and Native American culture. The designation was made under the Antiquities Act with bi-partisan support from Colorado officials, the Native American community, local businesses and other stakeholders.

"Chimney Rock draws thousands of visitors who seek out its rich cultural and recreational opportunities," said President Obama. "Today's designation will ensure this important and historic site will receive the protection it deserves."

"Thousands of people come every year to experience the cultural, and spiritual significance of Chimney Rock," said Agriculture Secretary Tom Vilsack. "With President Obama's action and the strong support of the Native American community and others throughout the region, this new monument will bring new economic opportunity to Archuleta County and the Four Corners region as more visitors from around the world come to see this national treasure."

The 4,726 acre Chimney Rock National Monument will be managed by the USDA Forest Service - the seventh National Monument managed by the agency - in close collaboration with tribal, community, state, and Federal partners.

Today, Chimney Rock is one of the best recognized and most unique archaeological resources in North America, home to hundreds of ruins built by the Ancestral Pueblo People about 1,000 years ago, including the highest elevation ceremonial "great house" in the Southwest. Notably, every 18.6 years, during the northern lunar standstill, the moonrise is aligned with the sites two rock pinnacles, as well as during the summer and winter solstices, and the fall and spring equinoxes. Descendants of the Ancestral Pueblo People return to Chimney Rock to visit their ancestors and for other spiritual and traditional purposes.
(Continued from page 1)  

(ii) 25 percent of the total amount shall be apportioned equally among each Indian tribe providing at least 200,000 vehicle revenue miles of public transportation service annually, as reported to the Secretary; and

(iii) 25 percent of the total amount shall be apportioned among each Indian tribe providing public transportation on tribal lands (as defined by the Bureau of the Census) on which more than 1,000 low-income individuals reside (as determined by the Bureau of the Census) so that each Indian tribe shall receive an amount equal to the total amount apportioned under this clause multiplied by the ratio of the number of low-income individuals residing on an Indian tribe’s lands divided by the total number of low-income individuals on tribal lands on which more than 1,000 low-income individuals reside.

(B) LIMITATION.—No recipient shall receive more than $300,000 of the amounts apportioned under subparagraph (A)(iii) in a fiscal year.

(C) REMAINING AMOUNTS.—Of the amounts made available under subparagraph (A)(iii), any amounts not apportioned under that subparagraph shall be allocated among Indian tribes receiving less than $300,000 in a fiscal year according to the formula specified in that clause. 76

(D) LOW-INCOME INDIVIDUALS.—For purposes of subparagraph (A)(iii), the term ‘low-income individual’ means an individual whose family income is at or below 100 percent of the poverty line, as that term is defined in section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)), including any revision required by that section, for a family of the size involved.

(2) NON-TRIBAL SERVICE PROVIDERS.—A recipient that is an Indian tribe may use funds apportioned under this subsection to finance public transportation services provided by a nontribal provider of public transportation that connects residents of tribal lands with surrounding communities, improves access to employment or healthcare, or otherwise addresses the mobility needs of tribal members.

Visit FTA’s new web page for information and updates on MAP-21 implementation and guidance: www.fta.dot.gov/map21

The Passage of MAP-21 and NAHASDA

On July 3, 2012, HUD published a Federal Register notice announcing its intent to initiate negotiated rulemaking for the purpose of developing regulatory changes to the funding formula for the Indian Housing Block Grant program authorized by the Native American Housing Assistance and Self-Determination Act of 1996. This document explains how persons may be nominated to serve as members on the negotiated rulemaking committee. The deadline to submit the nomination is November 19, 2012. This is important because the Map-21 funding formula will now be calculated using NAHASDA data as described below:

Moving Ahead for Progress in the 21st Century Act’ or the ‘MAP–21’.
Yurok Tribal Scenic Byways Program
By Isaac Kinney, Scenic Byways Coordinator, Yurok Tribe

Profile
The Yurok Ancestral Territory is one of the most isolated wilderness areas of California. The ancestral territory boundary spans Humboldt and Del Norte Counties, starting just above the confluence of Slate Creek with the Klamath River and extending down-river to the mouth of the Klamath River at the village of Requa along the Pacific Ocean.

Background
The Yurok Scenic Byways Program is regarded as a key strategy to stimulate greater economic opportunities and reverberate the Yurok voice. To develop scenic byway projects, we first built our own foundational tribal scenic byways program.

The Yurok Tribe had been working for the past several years to set a vision for the creation of a scenic byways program. This included working with partners to assess and plan cooperative consideration for designation of roads on and leading to the ancestral territory of the Yurok Reservation. In 2009, the collaborative efforts of the Yurok Tribe and leadership led to a National Scenic Byway grant for “Establishing a Yurok Scenic Byways Program.” This allowed our dream to become a reality.

Our program was established and built upon four defining cornerstone elements:

1. An operations document that set up the program scope, identified the mission and goals, and established policies and procedures.
2. A physical inventory of the byway system extending throughout the entire Yurok Ancestral territory—historical tribal lands not limited to reservation boundaries.
3. A methodology paralleling Yurok values, allowing the ability to incorporate tribal perspective and definition of “scenic.” This proved critical to the tribe staying in the “driver’s seat” in development of its own program, and it supported the exercising of tribal sovereignty and self-governance within the scope of the National Scenic Byways Program.
4. A strategic plan to guide future scenic byway projects. This included continuing coordination with surrounding agencies and businesses to develop a CMP, an economic impact study, and an interpretative plan of cultural and environmental resources.

Work began on these four defining documents in July 2010, and was completed February 2011.

(Continued on page 6)
Community/Stakeholder Outreach

The Yurok Tribe’s transportation team organized community meetings in both Weitchpec and Klamath, and stakeholder meetings primarily in Klamath (nine total). There were also monthly meetings at the North Coast Tribal Transportation Commission comprised of the thirteen tribes in Humboldt and Del Norte Counties.

At the meetings, presentations on the National Scenic Byways Program were given and discussions by community members were held. Community members identified the need for better interpretive services to educate visitors on local protocols and to share information on the surrounding recreational activities. Many felt that if this information were readily available at an information center, away from ceremonial sites, miscommunication would be minimized. Protection of culturally sensitive sites and areas was determined to be critical to the successful implementation of the Yurok Scenic Byways Program, and remains a primary goal.

Surrounding tribes expressed interest in a forum in which their story may be heard by the visitors as well, helping to illustrate the diversity from one tribe to another in Northwest California. The Redwood National Park Service expressed the need for strong collaboration in any signage or interpretive panel development.

The Yurok Tribe worked with a consultant to develop the policies and procedures and an inventory. Once completed, it was circulated within various tribal departments, including the Cultural Resources Department and the Yurok Economic Development Corporation. After incorporation of initial comments, the document was presented via another round of stakeholder and community meetings. The same process was conducted for the evaluation methodology and the strategic plan. After all four documents went through the outlined processes, they were presented in a tribal council meeting. The tribal council approved the documents and established the Yurok Scenic Byways Program in mid-April of 2011.

The program has spurred the tribe to offer various recreational opportunities, with the scenic byway being the common thread.  

Isaac Kinney

Key Milestones/Achievements

The acceptance and adoption of the four defining documents that established the Yurok Tribal Scenic Byways Program is a major achievement. Since Tribal decision-making processes are consensus-based in nature, significant effort over the course of two years was spent successfully bringing this process to fruition. Additionally, we consider our government-to-government relationship with the Federal Highway Administration (FHWA) as another significant achievement for the scenic byways program. We believe working directly with FHWA on scenic byways supports tribal core values, principles, and objectives.

Lessons Learned

We recognized the importance of establishing our own tribal program and constructing a “road map” for future projects. Having our own program scope in place provided a key foundational piece and strategic plan to effectively partner and pursue other funding sources to complement our byways projects. It provides an effective ground operational plan for accomplishing tribal goals and a basis for local, regional, and grassroots collaborative partnerships and stakeholder building.

Educating the local community about the National Scenic Byways Program was one of our biggest challenges. At regular meetings, we conveyed the message that this program’s principles echo Yurok values, and stakeholders began to see the multiple benefits it offers.

Our advice to any tribe wanting to develop their own scenic byway program is to maintain consistency in communication, from community meetings to one-on-one discussions with locals and agencies. Communicating new developments ensures that input is gathered incrementally and everyone has the opportunity to participate. This approach also helps stakeholders see where ongoing complementary projects fit together, supporting the
Conclusion

The Yurok Scenic Byway Program is just one piece of a network connected to new opportunities for cultural tourism. This approach is the conduit in which to open doors for the byway traveler to glimpse the Yurok Tribe. The Yurok Tribe believes that being proactive, and practicing proper community planning, is an effective method for successful byways projects. The tribe’s goal is to provide the visitor with a travel and sensory experience of the people and the landscape.

Future scenic byways projects include completion of the Cultural and Environmental Resources Interpretive Plan, Corridor Management Plan, and tribal designation of the Klamath River and specific trails appropriate for visitors. One additional complementary project is the Yurok Park Transit Service Feasibility Study. This study will identify strategies for utilizing the Klamath River to alleviate congestion problems within the Redwood National Park and provide tourists a unique regional travel experience.

One of the benefits from the establishment of the Yurok Scenic Byway Program is having a tool to guide cultural tourism development. The program has spurred the tribe to offer various recreational opportunities, with the scenic byway being the common thread.

Secretary Salazar Approves First-Ever Commercial Solar Energy Project on American Indian Trust Lands

350 megawatt photovoltaic facility in Nevada will benefit Moapa Band of Paiute Indians, generate enough power for over 100,000 homes

As part of the Obama Administration’s all of the above approach to American energy, Secretary of the Interior Ken Salazar approved a 350-megawatt solar energy project on tribal trust land of the Moapa Band of Paiute Indians (Tribe) in Clark County, Nevada. The project marks a milestone as the first-ever, utility-scale solar project approved for development on tribal lands, and is one of the many steps the administration has taken to help strengthen tribal communities.

The project is also the 31st utility-scale renewable energy project that Interior has approved since 2009 as part of a Department-wide effort to advance smart development of renewable energy on our nation’s public lands. Prior to 2009, there were no solar energy projects permitted on public lands; today’s approval brings the total to 17 solar projects, 6 wind farms, and 8 geothermal plants. If built by the companies, the renewable energy projects approved by this administration will provide approximately 7,200 megawatts of power to communities across the West, or enough to power nearly 2.5 million homes. These achievements build on the historic expansion of renewable energy under President Obama, with energy from sources like wind and solar doubling since the President took office.

“This trailblazing project is part of the President’s commitment to help build strong, sustainable tribal communities by supporting safe and responsible renewable energy development,” Secretary Salazar said. “Tribal lands hold great renewable energy potential, and smart development of these resources has the power to strengthen tribal economies, create jobs and generate clean electricity for communities across Indian Country.”

The Record of Decision signed today approves the construction, operation and maintenance of a low-impact photovoltaic (PV) facility and associated infrastructure on about 2,000 acres of the Tribe’s reservation, located 30 miles north of Las Vegas. The site represents about three percent of the Tribe’s 71,954-acres, which are held in trust by the U.S. Government. The project is expected to generate about 400 jobs at peak construction and 15-20 permanent jobs.

“This is a great day for the Moapa Band of Paiute Indians, and for Indian Country as a whole,” said Donald “Del” Laverdure, Acting Assistant Secretary of Indian Affairs. “As our nation’s energy portfolio continues to grow, it is important that tribal communities have the opportunity to harness the energy of the wind and sun in a way that can power our homes, businesses and economies. Today is a important step in that direction.”

The solar project approved today builds on President Obama’s strong record of supporting rural economies through the White House Rural Council. Established one year ago, the Rural Council has focused on maximizing the impact of Federal investment to promote economic prosperity and improve the quality of life in rural communities, including on tribal lands.

Proposed by K Road Moapa Solar LLC, the project would be built in three phases of 100-150 megawatts. In addition to PV panel arrays, major project components include a 500-kilovolt transmission line to deliver power to the grid and a 12-kilovolt transmission line to the existing Moapa Travel Plaza after Phase 1 is complete. About 12 acres of U.S. public land administered by the Bureau of Land Management would be required for the 500-kv transmission line.

The project will generate lease income for the tribe, create new jobs and employment opportunities for tribal members, and connect the existing tribally-owned Travel Plaza to the electrical grid, decreasing its dependence on a diesel-powered generator. The procurement of construction materials and equipment is expected to generate additional sales and use tax revenues for the county and the state.

In evaluating the proposed project’s compliance with the National Environmental Policy Act, the Bureau of Indian Affairs, as the lead federal agency, worked closely with cooperating agencies, including the Bureau of Land Management, U.S. Environmental Protection Agency, U.S. Army Corps of Engineers and the Moapa Band.

To minimize and mitigate potential environmental impacts, a Desert Tortoise Translocation Plan, Bird and Bat Conservation Strategy and Weed Management Plan will be implemented, and natural resources monitoring by qualified biologists will be conducted during all surface disturbing activities. Tortoises found within the project boundary would be relocated within the reservation in accordance with U.S. Fish and Wildlife Service protocols. No water will be used in the production of electricity, but will be used periodically for cleaning the photovoltaic panels.

Under the Obama Administration’s initiatives to foster tribal energy self-sufficiency and advance economic competitiveness, Interior is also engaged in a sweeping reform of federal surface leasing regulations for American Indian lands that will streamline the approval process for home ownership and spur renewable energy development in Indian Country. As trustee for the land and resources of federally-recognized tribes, Interior is responsible for managing about 55 million surface acres in Indian Country.

A map of the project area is at: http://www.doi.gov/news/pressreleases/loader.cfm?csModule=security/getfile&amp;pageid=306690
K Road Moapa Solar Project

**Toward a safe, clean energy future:** The K Road Moapa Solar Project is the first large scale solar project approved on tribal land in the country.

**VITALS**

**Location:** Moapa River Indian Reservation  
Clark County, Nevada  
**Technology:** Photovoltaic (PV)  
**Electricity production capacity:** 350 megawatts  
**Company:** K Road Moapa Solar LLC

**FEDERAL ACTIONS**

- The Bureau of Indian Affairs (BIA) will approve a solar energy ground lease and associated agreements between K Road Moapa Solar LLC and the Moapa Band of Paiute Indians (Tribe), including associated rights-of-ways (ROWs) and easements for ancillary facilities on tribal land.
- The Bureau of Land Management (BLM) will approve ROWs for an up to 500 kilovolt (kV) transmission line to connect the new solar plant to the Crystal Substation, as well as access roads on federal public lands and within a BLM-managed utility corridor within the Reservation.

**BY THE NUMBERS - The project is expected to:**

- Generate enough electricity to power approximately 100,000 homes  
- Create 400 jobs during peak construction and 15-20 permanent jobs  
- Be built on approximately 2,000 acres of tribal land, about three percent of Tribe’s 71,954 acres which are held in trust by the U.S. government  
- Be constructed in three phases of 100-150 megawatts  
- Include a 500-kilovolt transmission line and a 12-kilovolt transmission line to the existing Moapa Travel Plaza after Phase 1 is complete.

**ECONOMIC BENEFITS FOR THE TRIBE**

- The project will generate lease income and revenue for the tribe over the 50-year term.  
- The project will connect the existing tribally-owned Travel Plaza to the electrical grid, decreasing its dependence on a diesel powered generator.

**STRONG ENVIRONMENTAL REVIEW AND MITIGATION:**

The BIA has worked closely with federal, state, tribal and local partners, members of the conservation community and interested stakeholders to advance an environmentally responsible project.

- **Early Planning:** The project has several plans in place to reduce or minimize impacts on the ecosystem and wildlife, including a Desert Tortoise Translocation Plan, Bird and Bat Conservation Strategy, and a Weed Management Plan.
- **Smart Design:** Electric transmission poles will be designed to be avian safe in accordance with the most recent technology; a post-construction study will be implemented to monitor and report possible bird strikes during project operation.
- **Alternative Habitat:** the Tribe has set aside 6,000 acres on the Reservation as a suitable habitat for any desert tortoises that need to be relocated.
- **Monitoring:** Qualified biologists will monitor construction; all desert tortoises will be monitored for five years, in accordance with U.S. Fish and Wildlife Service (USFWS) standards.

**THE BIG PICTURE:**

The K Road Moapa Solar Project will advance tribal economic competitiveness and job creation, serve as an example of tribal energy self-sufficiency and sustainability, and encourage further renewable energy projects on tribal land. It is one of the projects that will help achieve the Administration and Interior initiative to make a rapid and responsible move to large-scale production of renewable energy on public lands. To date, Secretary Salazar has approved 31 utility-scale solar projects that, combined, will generate more than 7,200 megawatts, power up to 2.5 million homes and generate thousands of jobs. The State of Nevada is working to achieve a 25% Renewable Portfolio Standard by 2025.
Rural Road Safety & Toward Zero Deaths

Methodology and References

2007 - 2009 Average Annual Rural Road Fatalities

Fatality Rates
Fatality data is drawn from the Fatality Analysis Reporting System (FARS). The Urban Area data set from the U.S. National Atlas (nationalatlas.gov/mild/urbanasap.html) was used to determine which events were rural or urban. Often, buffers of varying size are created around the designated urban areas to capture fatalities occurring in rural areas in close proximity to urban areas. For the purposes of this study, no buffers were used in order to more fully illustrate the severity of the rural highway safety problem. Using this method, approximately 79% of road fatalities occur in rural areas. More commonly cited numbers come from the National Highway Traffic Safety Administration, which reported in 2008 that 56% of all traffic fatalities occurred in rural areas (www-nrd.nhtsa.dot.gov/Pubs/811164.pdf). According to the U.S. Census Bureau, only 23% of the population lived in rural areas that year. More information on rural fatalities by state can be found at safety.fhwa.dot.gov/local_rural/rural_fatal.cfm.

TZD States
At this time a single, national, comprehensive list of TZD states does not exist. The states included by CERS were identified by examining the Strategic Highway Safety Plan (SHSP) of each state for an explicit mission, vision, or goal of zero fatalities. A small number of states made no mention of a zero fatality goal in their SHSP but do have other, official state-sponsored zero death objectives in other highway documents or statewide safety programs. These states have also been included.

Other agencies and organizations have internal, unofficial lists of TZD states, but none is considered authoritative. Disagreement arises over the degree of commitment to the zero death goal: some states only have a goal or vision for TZD, while others have formal agencies, partnerships, and educational campaigns. Some states use the zero fatality goal as the backbone of their SHSP, but not beyond. More commonly, states acknowledge a long-term zero death goal but do not necessarily have aggressive interim goals to achieve zero deaths by a target year. CERS and many organizations look forward to the forthcoming National Cooperative Highway Research Program (NCHRP) Project 17-51 to further define the zero fatality approach as a basis for determining which states should be considered TZD states. More on the NCHRP project is available at www.strategicsafetyplan.com/index.html. This map is current as of March 6, 2012.

While biologists may be rejoicing over the recent discovery of a rare spider that was thought to be extinct, not everyone is elated -- particularly commuters around San Antonio, Texas.

Workers found the Braken Bat Cave Meshweaver (*Cicurina venii*) spider, which hasn't been seen in three decades, in the middle of a $15.1 million highway construction project in northwestern San Antonio. The eyeless arachnid is on the endangered species list—since construction would disrupt the spider's natural habitat, the project has been halted for the foreseeable future.

Jean Krejca, a biologist and President of Zara Environmental who was consulting on the project, made the extraordinary discovery after a downpour of rain revealed a 6-foot deep spider hole. After dissecting the spider, a taxonomist later confirmed that the distinct-looking arachnid was, in fact, the Meshweaver, named for its pattern of webbing.

The Meshweaver was placed on the federal endangered species list in 2000, along with eight other spiders found only in the Texas county. George Veni first identified the spider in 1980 in a location five miles away from the construction site. Krejca compared the discovery to "stumbling on a new Galapagos Island in terms of the biological significance of the region."

Construction on the highway at Texas 151 and Loop 1604 began in April and biologists like Krejca were on hand to "observe and preserve" the scene, which is reportedly full of natural resources, according to Stirling J. Robertson, the Texas Department of Transportation's biology team leader.

Aside from the Meshweaver, biologists discovered 19 cave features, five of which contained other non-endangered species of spiders. However, Robertson believes the entire area may be a Meshweaver habitat.

Construction has been terminated until the U.S. Fish and Wildlife Service and Federal Highway Administration can determine the best way to continue the project without disturbing the rare spider's habitat. Josh Donat, San Antonio District spokesman for the Texas Department of Transportation, said it is too early to tell which options are viable.

New Laws Report 2010-2012
A list of all bills enacted in a calendar year during the Regular Session of the Legislature. unless otherwise noted. To view the report go to: http://www.leginfo.ca.gov/pdf/BillsEnactedReport2011.pdf

12 Bills Pending
7 Bills Tribal Specific

LEGISLATIVE ACTION TO WATCH

Senate Bill 803
Sen. DeSaulnier, introduced 2/18/11. Status: 9/19/12. Signed by the Governor and Chaptered by the Secretary of State, #379.

California Youth Leadership Project.
Existing law establishes various programs to advocate for the needs of seniors and other groups, including the Senior Legislature.
This bill would establish the California Youth Leadership Project under the State Department of Education for the purpose of supporting and promoting youth civic engagement by awarding scholarships to youth and civic engagement programs.
The bill would create the California Youth Leadership Project Committee, which would be chaired by the Superintendent of Public Instruction and be composed of specified appointed members.
The bill would authorize the advisory committee to enter into an interagency agreement with the State Department of Education to carry out necessary administrative functions. The advisory committee also would be charged with determining when there are sufficient funds to support the program, and if it determines that there are insufficient funds to cover all costs, the activities of the California Youth Leadership Project would cease.
This bill contains other related provisions and other existing laws.

Senate Bill 162

Summary:
This bill would add to the nonexclusive list of topics that state agencies may cooperate with federally recognized Indian tribes by consulting on a government-to-government basis, in a respectful and meaningful manner, with respect to the transfer of fee land into federal trust status. This a fee-to-trust land acquisition application, as specified. The bill would prohibit a state agency from opposing specified fee-to-trust land acquisition applications.

TRANSPORTATION EVENTS CALENDAR

Please visit the National Indian Justice Center web site to view more upcoming transportation events. Go to: www.nijc.org/ttap_events.html

OCTOBER 2012

October 5-6
27th Annual California Indian Conference
Cal State San Marcos
San Marcos, CA
For more information go to: http://www.csusm.edu/air/californiaindianconference/index.html

October 14-17
National Conference for Rural Public and Intercity Bus Transportation Connecting Communities: Sharing Solutions
Little America Hotel
Salt Lake City, UT
For more information go to: http://www.ribtc.org/

October 24-26
Transportation 101
Riviera Hotel and Casino,
Las Vegas, NV
For more information go to: http://www.nijc.org/training.html

DECEMBER 2012

December 5-7
Protecting Sacred Sites and Monitoring Cultural Resource
Flamingo Hotel and Casino
Las Vegas, NV
For more information go to: http://www.nijc.org/training.html

December 10-13
Intertribal Transportation Association (ITA) 18th Annual Conference & Meeting
Tropicana Hotel & Casino
Las Vegas, NV
For more information go to: http://gallery.mailchimp.com/fcf27858b524c94e746bc5dcf/files/ITA2012AnnualMtgConfFlyer.pdf

JANUARY 2013

January 13-17
2013 92nd Annual Transportation Research Board (TRB) Meeting
Washington Wardman Park, Omni Shoreham, and Hilton Hotels Washington, DC
For more information go to: http://www.trb.org/AnnualMeeting2013/AnnualMeeting2013.aspx

NOVEMBER 2012

November 5-8
Tribal GIS 2012: NTGISC’s 3rd Annual National Tribal GIS Conference for Tribal GIS Professionals
Southwestern Indian Polytechnic Institute
Albuquerque, NM
For more information go to: http://ttap.colostate.edu/newsevent.aspx?id=192

November 8-9
2012 UTC Spotlight Conference on Research Perspectives on Sustainable Energy and Transportation
Keck Center of the National Academies
Washington, DC

November 12-13
12th National Light Rail and Streetcar Conference
Grand America Hotel
Salt Lake City, UT
For more information go to: http://www.trb.org/conferences/lrt2012.aspx

NOVEMBER 2012

15th Annual National Tribal Transportation (NTTC) Conference
Pointe Hilton Tapatio Cliffs Resort
Phoenix, AZ

Room rate: $105+tax
Group name: 15th Annual NTTC
Cut-off date for hotel: October 26
Reservations: 1-800-445-8667
Conference Registration:
$375 until October 12
$425 after October 12

For more information go to: http://ttap.colostate.edu/newsevent.aspx?id=192
FEDERAL

Federal Highway Administration
United States Department of Transportation
1200 New Jersey Ave, SE
Washington, DC 20590
http://www.fhwa.dot.gov/index.html

Federal Highway Administration (FHWA) is charged with the broad responsibility of ensuring that America’s roads and highways continue to be the safest and most technologically up-to-date. Although State, local, and tribal governments own most of the Nation’s highways, FHWA provides financial and technical support to them for constructing, improving, and preserving America’s highway system.

Central Federal Lands Highway Division
Federal Highway Administration
12300 West Dakota Ave,
Lakewood, CO 80228
(720) 963-3500
http://www.cflhd.gov/index.cfm

The Central Federal Lands Highway Division (CFLHD) operates as part of the Federal Lands Highway Program, serving the needs of all central states. CFLHD actively administers the surveying, designing and constructing of forest highway system roads, parkways and park roads, Indian reservation roads, defense access roads, and other Federal lands roads. CFLHD also provides training, technology, deployment, engineering services, and products to other customers.

Office of Federal Lands Highway
Federal Highway Administration
1200 New Jersey Avenue, SE
Washington, DC 20590
(202) 366-9494
http://flh.fhwa.dot.gov/

The Office of Federal Lands Highway (FLH) provides program stewardship and transportation engineering services for planning, design, construction, and rehabilitation of the highways and bridges that provide access to and through federally owned lands.

The primary purpose of the FLHP is to provide financial resources and technical assistance for a coordinated program of public roads that service the transportation needs of Federal and Indian lands.

Federal Transit Administration
1200 New Jersey Avenue, SE
4th & 5th Floors East Building
Washington, DC 20590
http://www.fta.dot.gov/

Federal Transit Administration (FTA) is one of 10 modal administrations within the U.S. Department of Transportation. Headed by an Administrator who is appointed by the President of the United States, FTA administers federal funding to support a variety of locally planned, constructed, and operated public transportation systems throughout the U.S., including buses, subways, light rail, commuter rail, streetcars, monorail, passenger ferry boats, inclined railways, and people movers.

FTA Region 9 Offices
Federal Transit Administration
201 Mission Street Suite 1650
San Francisco, CA 94105
(415) 744-3133
http://www.fta.dot.gov/about/region9.html

Rural Transit Assistance Program (RTAP)
The mission is to address the needs of rural, small urban and tribal transit operators across the nation.
Union Station Business Center
Ten G Street NE, Suite 710
Washington, DC 20002
Main: 202-248-5043
Fax: 202-289-6539
http://www.nationalrtap.org/
National Local Technical Assistance Program Association (NLTPA)
A not-for-profit organization representing and serving the 58 LTAP and TTAP Member-Centers in the United States and Puerto Rico. All staff of Member-Centers are entitled to Association services and opportunities to serve. www.nltpa.org

Bureau Of Indian Affairs
There are millions of acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 561 federal recognized tribal governments in the United States. Developing forestlands, leasing assets on these lands, directing agricultural programs, protecting water and land rights, developing and maintaining infrastructure and economic development are all part of the agency's responsibility. In addition, the Bureau of Indian Affairs provides education services to approximately 48,000 Indian students.

Bureau of Indian Affairs

VIDEOS AND DVDS

Environmental Justice in Transportation for California Tribes Video Workbook
Produced by the National Indian Justice Center.
Available at: 707-579-5507 or,
http://nijc.org/publications.html

Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users.
The Forest Service, Bureau of Land Management and Federal Highway Administration have jointly developed training videos to show how the various programs authorized within SAFETEA-LU can benefit public lands and their neighboring communities.
The training video can be found at: http://www.fs.fed.us/eng/safetea-lu

FHWA LTAP/TTAP Clearinghouse
Operators Pre-Start Motor Grading Inspection
Promotes motor grader safety and productivity for county and city road agencies.

FHWA Office of Safety Design
Two informational videos on DVD.
FHWA-SA-08-007. Median Barriers—A Solution to Cross-Median crashes.
FHWA-SA-07-024. The previously released video, Rumble Strips—A Sound Investment.
Order from FHWA Report Center – publication number Report.center@fhwa.dot.gov.

FHWA Office of Safety
2009 Road Safety Audit (RSA) Video
FHWA has created a new video on Road Safety Audits (RSAs). The new RSA video focuses on the benefits of using a multidisciplinary approach to improve safety. For more information or to view the video go to:

FHWA Office of Safety
Modern Roundabouts: A Safer Choice (FHWA-SA-10-023)
The video explains the many benefits of roundabout intersections and is intended primarily for decision makers in state and local transportation agencies to overcome the common barriers and reasons for not considering roundabouts as intersection alternatives. It is presented in a non-technical manner and can be used at public meetings for proposed roundabout projects.
For more information go to:
http://safety.fhwa.dot.gov/intersection/roundabouts/

Sign Retroreflectivity Informational Presentations
The Center for Technology & Training at the Michigan Tech Transportation Institute has developed a web based informational presentation designed to help local agencies begin the discussion of sign retroreflectivity with decision-makers.
To download the videos go to:
http://ctt.mtu.edu/SignRetroPresentations.html

Zero Fatalities Utah DOT
Reggie P. Shaw Video
His vehicle drifted across the highway centerline and side-swiped an oncoming vehicle on Sept. 22, 2006. The officers investigated and found out that Shaw was text messaging during the time of his accident.
To view the video got to:

Tribal School Zone Safety: Video and Toolkit
To obtain a free DVD, Please contact:
Chimai Ngo, 202-366-1231

Roadway Safety Foundation
New Run-Off-Road/Rumble Strip Brochure and
Recognize-React-Recover DVD
To obtain free copies of the brochure and DVD go to:

Road Safety Audit (RSA) Software
Is intended to be a guiding and process tracking tool enabling the use of RSA prompt lists at variety of detail levels, while providing a way to accompany each safety issue raised with a discussion and assessment
To download the software go to:
http://safety.fhwa.dot.gov/rsa/software/

Rumble on the Reservation
This 11-minute DVD highlights rumble strips as a cost-effective crash countermeasure that American Indian communities can incorporate into roadway safety projects on tribal lands.
Roadway Safety Foundation
Please contact us at 202-857-1228 or info@roadwaysafety.org to order free copies

Dine Biitah: “Among the People”, Scenic Byway
Threads its way through over a hundred miles of Navajo land, people, culture and natural beauty.
To obtain a copy go to:

One Design—10,000 Bridges
Thousands of bridges across America must be replaced. A new tool kit for designing and constructing bridges brings home the benefits of accelerated bridge construction techniques so local contractors can use typical equipment to build bridges quickly and efficiently. Developed through the second Strategic Highway Research Program, a division of the Transportation Research Board, the tool kit was demonstrated in construction of a bridge over the Keg Creek near Council Bluffs, Iowa.

To View the video go to:
http://www.trb.org/StrategicHighwayResearchProgram2SHRP2/Pages/Video-One_Design-10,000_Bridges_536.aspx

Video Demonstrations of Three SHRP 2 Products Now Available
Step-by-step demonstrations narrated by the principal investigators of three SHRP 2 products that were featured in the SHRP 2 booth at the 91st TRB Annual Meeting are now available on the SHRP 2 website
- Geotechnical Solutions for Transportation Infrastructure: a web tool that provides guidance for soil improvement, rapid embankment construction, and stabilization of the pavement working platform
- Transportation Project Impact Case Studies (T-PICS): a national database of case studies that can be used to assess the pre- and post-construction economic development and related effects of various kinds of transportation projects
- My Road Trip Advisor: a tool that predicts arrival times for travelers based on travel time reliability information

To view the videos go to:
http://www.trb.org/StrategicHighwayResearchProgram2SHRP2/Pages/_SHRP_2_Video_Demonstrations_at_the_91st_TRB_Annual_Meeting_533.aspx

Ordering Information
Printed copies of our in-house publications are available on a first-come, first served basis. Priority is given to Tribal Transportation Personnel. PDF versions of most of our publications are available on our website:
http://www.nijc.org/ttap_resources.html

All our videos, publications and CD-ROMs in our lending library are loaned for a four-week period. Two titles may be borrowed at a time.

To order or borrow materials, please send a request to: barry@nijc.org or, nijc@aol.com or Fax a request to:707-579-9019.

To view past issues of publications, videos and development programs, please visit our website library at:
http://nijc.org/datasheets/ttap/TTAP_Resourceslist.asp
NOTE: many of the listed transportation programs are dependant on the implementation of MAP-21.

CALIFORNIA DEPARTMENT OF TRANSPORTATION (CALTRANS)

The State-Legislated Safe Routes to School Program
California Safe Routes to School program is contained in the Streets & Highway Code Section 2330-2334. For more information on this program go to: http://www.dot.ca.gov/hq/LocalPrograms/saferoutes/saferoutes.htm

Memorandum of Understanding (MOU)
The California Department of Transportation (Caltrans), in consultation with the Governor’s Office of Small Business Advocate, have entered into a Memorandum of Understanding (MOU) with the U.S. Small Business Administration (SBA), to offer a technical assistance surety bond guarantee program to promote increased small business participation in this initiative provides a viable means to advance the unimpeded participation of all willing, ready, and able construction contractors and subcontractors, professional architectural and engineering firms, suppliers and truckers, without regard to race, ethnicity, gender, or physical disability to participate in the State’s Contracting Program. For more information contact a Small Business Development Center in your area, or call Linda Madden 919-324-8384; e-mail Linda_Madden@dot.ca.gov

California Department of Resources Recycling and Recovery (CalRecycle)
CalRecycle offers a variety of grant funding opportunities to assist public and private entities in safely and effectively managing California’s waste stream.

- Beverage Container Recycling Grants
- Farm and Ranch Cleanup Grants
- Household Hazardous Waste (HHW) Grants
- Local Enforcement Agency Grants
- Solid Waste Disposal and Site Cleanup Grants
- Tire Recycling, Cleanup, and Enforcement Grants
- Used Oil Recycling Grants

2012/13 application materials will tentatively be available Fall 2012
Additional grant information and list of active grants can be found at: http://www.calrecycle.ca.gov/Grants/

Highway Safety Improvement Program (HSIP)
The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), which was signed into law on August 10, 2005, established the Highway Safety Improvement Program (HSIP) as a core Federal-aid program. The overall purpose of this program is to achieve a significant reduction in traffic fatalities and serious injuries on all public roads through the implementation of infrastructure-related highway safety improvements. On April 23, 2012, Caltrans announced a combined call for HSIP and HR3 projects based upon anticipated federal safety funding in the upcoming 2013 FSTIP starting in October 2012. Caltrans expects the available funding apportioned to local agencies in the 2013 FSTIP to be approximately $100 million for HSIP and $15 million for HR3 in their respective 4 year plans. For more information go to: http://www.dot.ca.gov/hq/LocalPrograms/hsip.htm

NEVADA

Nevada Department of Transportation (NDOT)
Safe Routes to School Program
For more information regarding the Nevada Safe Routes to School, please visit: http://www.walknevada.com/

Nevada Transportation Enhancement Program
The Nevada Department of Transportation (NDOT) and the Federal Highway Administration (FHWA) share your interest in these projects and others that enhance the transportation experience in your area and make our communities more livable. The TE program was developed to fund projects that go beyond where typical transportation projects usually stop. For more information go to: www.nevadadot.com/About_NDOT/NDOT_Divisions/Planning/Enhancement_Program.aspx

FEDERAL

U.S. DEPARTMENT OF TRANSPORTATION

Federal Safe Routes to School Program (SRTS)
The Federal Safe Routes to School program (SRTS)
was authorized by SAFETA-LU (the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users). This federal program has different eligibility and local match requirements than the state-legislated program. For more information on this program go to: http://www.dot.ca.gov/hq/LocalPrograms/saferoutes/srts.htm

**Federal Transit Administration**

**Public Transportation On Indian Reservations (FTA 5311)**

Federally recognize tribes may use the funding for capital, operating, planning, and administrative expenses for public transit projects that meet the growing needs of rural tribal communities. Examples of eligible activities include: capital projects; operating costs of equipment and facilities for use in public transportation; and the acquisition of public transportation services, including service agreements with private providers of public transportation services.

FY 2013 to be announced.
For more information go to: http://www.fta.dot.gov/grants/13094_3553.html

**FHWA**

**Surface Transportation Environment and Planning Cooperative Research Program**

The STEP is the primary source of funds for FHWA to conduct research and develop tools and technologies to advance the state of the practice regarding national surface transportation and environmental decision-making.

In FY 2010, FHWA sought partnerships that leveraged limited research funding in STEP with other stakeholders and partners in order to increase the total amount of resources available to meet the nation’s surface transportation research needs.

The proposed FY2011 STEP funding levels are subject to the completion of the FY2012 Department of Transportation (DOT) appropriations process. The anticipated FY2012 STEP research efforts are preliminary and subject to change. In FY 2010, STEP addressed national research priorities that included:

1. Conducting research to develop climate change mitigation and adaptation strategies;
2. Improving state of the practice regarding livability and the impact of transportation on the environment;
3. Developing and/or supporting accurate models and tools for evaluating transportation measures and developing indicators of economic, social, and environmental performance of transportation systems;
4. Developing and deploying research to address congestion reduction efforts;
5. Developing transportation safety planning strategies for surface transportation systems and improvements;
6. Improving planning, operation, and management of surface transportation systems and rights of way;
7. Enhancing knowledge of strategies to improve transportation in rural areas and small communities;
8. Strengthening and advancing State/local and tribal capabilities regarding surface transportation and the environment;
9. Improving transportation decision-making and coordination across borders;
10. Conducting research to promote environmental streamlining/ stewardship;
11. Disseminating research results and advances in state of the practice through peer exchanges, workshops, conferences, etc;
12. Meeting additional priorities as determined by the Secretary; and
13. Refining the scope and research emphases through active outreach and in consultation with stakeholders.

The number of stakeholders with an interest in environment and planning research is enormous and diverse, includes three tiers:

**Tier 1 - Federal Agencies and Tribes:** There are at least a score of Federal agencies with strong interest in transportation planning and environmental programs including: the Departments of Commerce, Defense, Homeland Security, Agriculture, Energy, Interior (DOI) and Housing and Urban Development, the Environmental Protection Agency (EPA), and the Centers for Disease Control and Prevention (CDC).

Within each of these agencies, there are many discrete organizations/programs with an interest - e.g., National Park Service, U.S. Fish and Wildlife Service and Bureau of Land Management within the DOI. Within the US Department of Transportation (USDOT), FHWA partners with the Federal Transit Administration (FTA) on virtually all planning and environmental work, including research. The FHWA also coordinates with the Federal Railroad, Aviation, Research and Innovative Technology, National Highway Traffic Safety and Maritime Administrations, and with the Office of the Secretary of Transportation on Global Climate Change as well as other issues. There are over 500 federally recognized Native American Tribes, which have a major interest in research.
FUNDING (Continued)

affecting their planning and environmental needs. For more information go to:

Dwight David Eisenhower Transportation Fellowship Program
Eisenhower Tribal Colleges and Universities Fellowship
Provides Students in those schools with opportunities to pursue careers in Transportation. This fellowship also serves as a feeder for other Eisenhower Fellowships. Currently funded at $2.2M annually. For more information go to http://www.fhwa.dot.gov/tpp/ugp.htm

National Scenic Byways Program
Under the program, the U.S. Secretary of Transportation recognizes certain roads as National Scenic Byways or All-American Roads based on their archaeological, cultural, historic, natural, recreational, and scenic qualities. The program allows Indian Tribes to submit applications directly to FHWA division offices, and authorizes FHWA to enter into project or grant agreements directly with Indian Tribes. For more information go to http://www.bywaysonline.org/

Bureau of Indian Affairs
Traffic Safety on Indian Reservations
The Secretary of Transportation, Bureau of Indian Affairs ("BIA"), has announced that funds will be available to federally recognized Indian tribes on an annual basis for implementing traffic safety projects designed to reduce the number of traffic crashes, death, injuries, and property damage within Indian Country. Applications due May 1 of each program year. For more information go to: http://www.nijc.org/pdfs/TTAP/Social%20General%20Update%206.pdf

U.S. Department of Agriculture
USDA Rural Development Grants
The mission is to increase economic opportunity and improve the quality of life for rural residents. Rural Development fosters growth in homeownership, finances business development, and supports the creation of critical community and technology infrastructure. Further information on rural programs is available at a local USDA Rural Development web site: http://www.rurdev.usda.gov/rbs/bus/bprogs.htm

FEMA: Hazard Mitigation Grant Program
Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. This definition distinguishes actions that have a long-term impact from those that are more closely associated with immediate preparedness, response, and recovery activities. Hazard mitigation is the only phase of emergency management specifically dedicated to breaking the cycle of damage, reconstruction, and repeated damage. As such, States, Territories, Indian Tribal governments, and communities are encouraged to take advantage of funding provided by HMA programs in both the pre- and post-disaster timeframes. Together, these programs provide significant opportunities to reduce or eliminate potential losses to State, Tribal, and local assets through hazard mitigation planning and project grant funding. Each HMA program was authorized by separate legislative action, and as such, each program differs slightly in scope and intent. The Hazard Mitigation Grant Program (HMGP) may provide funds to States, Territories, Indian Tribal governments, local governments, and eligible private nonprofits following a Presidential major disaster declaration. The Pre-Disaster Mitigation (PDM), Flood Mitigation Assistance (FMA), Repetitive Flood Claims (RFC), and Severe Repetitive Loss Pilot (SRL) programs may provide funds annually to States, Territories, Indian Tribal governments, and local governments. For more information go to: http://www.fema.gov/government/grant/hmgp/index.shtm

Department of Commerce, Economic Development Administration
Economic Development Assistance Programs and Planning and Local Technical Assistance Programs
EDA’s mission is to lead the Federal economic development agenda by promoting innovation and competitiveness, preparing American regions for growth and success in the worldwide economy. In implementing this mission pursuant to the Public Works and Economic Development Act of 1965, as amended (42 U.S.C. § 3121 et seq.) (PWEDA), EDA advances economic growth by assisting communities and regions experiencing chronic high unemployment and low per capita income to create an environment that fosters innovation, promotes entrepreneurship, and attracts increased private capital investment. Applications are accepted on a continuing basis and processed as received. For FY 2012: Cycles 2 - Dec 15, Cycle 3 - Mar 9, Cycle 4- Jun 8, and For FY 2013: Cycle 1-Sep 14
“seed” grant awards to organizations that are growing our nation's network of greenways, blueways, trails and natural areas.

The Program operated by The Conservation Fund invites land trusts, local governments, and other organizations to submit proposals for small greenway project grants. Funded projects typically advance one or more of the following Program goals:

- Catalyzing new greenway projects
- Assisting grassroots greenway organizations
- Leveraging additional money for conservation and greenway development
- Promoting use and enjoyment of greenways

For more information go to:
http://www.conservationfund.org/kodak_awards

Department of Interior (DOI)
Funding availability is restricted to state governments and Federally recognized Indian Tribes. The Office of Surface Mining awards grants to States and Tribes to support the operation of APPROVED State and Tribal abandoned mine land (AML) reclamation programs. Approved programs use grant funds for mine site reclamation projects on eligible lands, which are lands and waters mined or affected by coal mining processes that occurred prior to August 7, 1977 as well as certain post-1977 and noncoal mining activity.

Deadline September 30, 2012, applications are due throughout the Fiscal Year (FY)

Centers for Disease Control and Prevention (CDC)
Community Transformation Grants -Small Communities Program financed solely by 2012 Public Prevention and Health funds.

The overarching purpose of this program is to prevent heart attack, stroke, cancer, diabetes and other leading chronic disease causes of death or disability through implementation of a variety of evidence based programs, policies, and infrastructure improvements to promote healthy lifestyles in small communities that improve health and health behaviors among an intervention population. The program aims to achieve this goal by supporting governmental and nongovernmental agencies and organizations, from multiple sectors, to implement evidence based strategies that align with their mission and to partner with agencies and organizations in other sectors to improve community health.

The Kodak American Greenways Program
Eastman Kodak Company, The Conservation Fund and the National Geographic Society team up each year to present the Kodak American Greenways Awards Program. One major element of the Program involves
§ 202. Tribal transportation program
(b) FUNDS DISTRIBUTION.—
(3) BASIS FOR FUNDING FORMULA.—…

(B) TRIBAL SHARES.—Tribal shares under this program shall be determined using the national tribal transportation facility inventory as calculated for fiscal year 2012, and the most recent data on American Indian and Alaska Native population within each Indian tribe’s American Indian/Alaska Native Reservation or Statistical Area, as computed under the Native American Housing Assistance and Self-Determination Act of 1996 (25 U.S.C. 4101 et seq.), in the following manner:
(i) 27 percent in the ratio that the total eligible road mileage in each tribe bears to the total eligible road mileage of all American Indians and Alaskan Natives. For the purposes of this calculation, eligible road mileage shall be computed based on the inventory described in paragraph (1), using only facilities included in the inventory described in clause (i), (ii), or (iii) of paragraph (1)(B).
(ii) 39 percent in the ratio that the total population in each tribe bears to the total population of all American Indians and Alaskan Natives.
(iii) 34 percent shall be divided equally among each Bureau of Indian Affairs region. Within each region, such share of funds shall be distributed to each Indian tribe in the ratio that the average total relative need distribution factors and population adjustment factors from fiscal years 2005 through 2011 for a tribe bears to the average total of relative need distribution factors and population adjustment factors for fiscal years 2005 through 2011 in that region.

Note: The Federal Highway Administration (FHWA) released interim guidance documents and Q&A’s regarding implementation of MAP-21. The materials are online at http://www.fhwa.dot.gov/map21/.
