Sustainable Practice: Pavement Restoration Featuring a Hot-in-Place Recycling Segment

By John B. Hauskins, P.E. PWLF, Director, Maricopa County DOT
Phoenix, Arizona

General background of the area

Phoenix, Arizona, is located in the heart of Maricopa County. The headquarters for the Maricopa County Department of Transportation (MCDOT) is located in the southwest portion of the city and has jurisdiction for all of the transportation routes for the unincorporated portions of the county. This amounts to over 2,000 miles of paved roads. Maricopa County is large, encompassing over 9,200 square miles with a population of over four million residents. Needless to say there are many roads and streets in this busy metropolitan area surrounded by more suburban and rural areas which essentially surround the Phoenix metropolitan area and about 27 other cities that have lesser populations.

The County has a Green Government Council which has a strategic initiative to develop and use green practices in the day-to-day operations of the various agencies within the County government. MCDOT has a goal of reviewing and implementing various work processes that lead to a sustainable and green government in accordance with this initiative.

So, when various projects are undertaken by MCDOT, they are evaluated for possible inclusion into a plan to use green practices that will either save money, save fuel, or reduce greenhouse gas emissions. Recently, such a project was identified in the northwestern portion of the valley that were in a reasonable proximity of each other. The total project included both hot mix repaving and hot-in-place recycling of the existing pavement. The reasoning behind the decision to use two different methods was somewhat convoluted but makes sense when you consider the parameters and limitations of the methods. A discussion will be forthcoming later in this article as to the choices and the criteria used to make them.

Project information

The overall project consisted of 725,000 square yards of pavement to be restored to like new condition. The project was bid out and the bids were opened on March 1, 2012. The successful prime contractor was Sunland Asphalt of Tempe, Arizona. The notice to proceed was issued on April 4, 2012. The substantial completion was accomplished on July 2, 2012. The project used 55,660 tons of asphalt rubber concrete pavement. The total cost per square yard, for the entire project, was $10.55 per square yard.

(Continued on page 4)
The National Indian Justice Center is located in Santa Rosa, California. NIJC’s building also houses the administrative offices of the California Indian Museum and Cultural Center, the Intertribal Court of California and the Regional Tribal Justice Center. Construction is currently underway for the California Indian Museum and Cultural Center, which will include a storytelling venue, Native plants garden, California Indian foods, a small Native village, audio-visual displays that highlight California Indian history and the contributions of California Indians, as well as Edward Curtis prints and traveling exhibits. If you are in the area, please come visit and tour the facilities.

We are asking existing members of the Western TTAP Advisory Panel to confirm that you wish to continue your membership. We are also seeking new members for the Advisory Panel as we begin the new five year cycle of the Western TTAP. If you wish to continue on with your existing membership, or wish to become a member of the Advisory Panel please e-mail your contact information to Barry Litchfield, barry@nijc.org.

**SAVE THE DATE**

16th Annual National Tribal Transportation Conference

*October 28- November 1, 2013*

Shakopee Mdewakanton Sioux Community’s Mystic Lake Casino/Hotel

The 16th annual National Tribal Transportation Conference will be held in conjunction and cooperation with the Minnesota Tribes and Transportation Conference. For more information go to: [http://tribal-trans.org/](http://tribal-trans.org/)

**ANNOUNCEMENTS**

The Federal Highway Administration has issued interim guidance on operating assistance under MAP-21 for the Congestion Mitigation and Air Quality (CMAQ) Program. Operating assistance is limited to new transit, commuter and intercity passenger rail services, intermodal facilities, travel demand management strategies, including traffic operation centers, inspection and maintenance programs, and the incremental cost of expanding these services. For more information go to: [http://www.fhwa.dot.gov/map21/cmaq.cfm](http://www.fhwa.dot.gov/map21/cmaq.cfm)

We are pleased to announce that we are making some exciting changes at the National Transportation Consortium. First we have changed our website name to: [www.NativeTransit.org](http://www.NativeTransit.org)

We will be holding meetings with nearly all of the industry representatives this summer to begin work on our FTA compliant contract. We would like to get tribal input prior to those meetings so please send me a note on questions or comments. We are no longer using the services of Mark Quinlan and instead are self performing much of the day to day operations ourselves. However, Jim Work at Kona Management Group ([www.konamg.com](http://www.konamg.com)) has considerable skills in new ventures such as ours and we look forward to having his group joining our team. Finally, we are developing a new newsletter and a more robust online presence. Don't forget, we currently have negotiated terrific pricing for buses for casinos, elder and youth programs. Please contact me if you have a need and I'll direct you to the manufacturer who can help!

Kirk Vinish, National Transportation Consortium, Tel. (360) 303-4139

Most of the popular maps apps like Google Maps and Apple Maps have public transportation functionality built in, but they're not always perfect. The Transit App is built specifically for public transportation, and it provides a clean interface to get you to your destination easily. The Transit App works in 37 US cities, including New York, San Francisco, Houston, and plenty more. What makes The Transit App interesting is that since it's created specifically for public transportation, the interface is quick and responsive to help you get where you're going without messing around much in menus. Just type your destination, and The Transit App gets you a list of options from your location right away.

The roads paved in the project using both methods are as follows:

**Sun City Roads:**
- 99th Avenue from Olive Avenue to Beardsley Road (7.0 miles). This is the section featured in this article as the hot-in-place recycled section.
- Del Webb Boulevard from Grand Avenue to Bell Road (2.5 miles), totally removed and replaced with hot mix.

**Other Roads:**
- Salome Highway from Wintersburg Road to Old US80 (9.8 miles)
- Wintersburg Road from Salome Highway to Thomas Road Alignment (3.8 miles)
- I-17 Frontage Road Circle Mountain Road to Old Stage Road (2.9 miles)
- Circle Mountain Road from New River Road to 22nd Street (2.3 miles)
- 7th Avenue from Carefree Highway to Desert Hills Drive (3.0 miles)

**Hot-in-Place Recycling process**
For the purposes of this article, the focus is on the section of 99th Avenue from Olive Avenue to Beardsley Road (7.0 miles). This section of road was selected to use the hot in-place recycling process for the following reasons:

1. This section of roadway is long and straight with very few issues with regard to tapers valley gutters, conflicting objects and unusual circumstances that would cause a long paving train such as the hot-in-place recycling paving system to have to maneuver extensively.

2. The number of square yards easily exceeds the minimum economic level that would be attractive for a company to consider mobilizing and bringing in a large hot-in-place recycling paving train to accomplish the work. (This amount is approximately 80,000 square yards or so depending on several factors such as location, geometrics and type of work to be accomplished.) In this case there were over 200,000 square yards to be restored to a “like new” (defined more accurately later in this article) condition.

3. Due to the type of paving train and the rapidity of the recycling and repaving process, it was likely that traffic in the Sun City area would be minimally impacted by the process.

The rest of the pavement segments, which were less favorable candidates for the hot-in-place recycling proc-
ess, were overlaid with a 1.5-inch-thick layer of hot mix asphalt concrete pavement. Not all asphalt pavements are automatically good candidates for the hot-in-place recycling process. A PCR of at least 40 and a minimum 2½” to 3” of existing AC are essential for the hot-in-place recycling process.

The recycled segment was repaved by Cutler Repaving Inc. The process treated 218,095 square yards of pavement. The process was to use a long paving train and recycle and repave in one pass. The milling depth was one inch of cold milling prior to placement of one inch of hot-in-place recycling.

The pavement was initially 17 years old. Dynamic Modulus (E*) testing of the recycled AR compared favorably to the (E*) of new asphalt rubber (AR). The test results developed by AMEC (a consultant on the job) showed a favorable comparison to new AR pavement. The entire recycling portion of the project was accomplished in 16.5 days. The entire section was repaved in only two passes by extending the screed to a width of 18 feet wide. Due to the wide paving width, some cross slope issues were resolved in the recycling process.

Here are the facts for the costs of just the recycled section. The total cost was $675,722 for the 218,095 square yards. That is a cost of $3.098 per square yard. The estimated savings was conservatively estimated to be at least $500,000. The roadway surface is like new and the appearance is also good. The ride and smoothness are very good. In short, hot in-place recycling is a good candidate for a sustainable practice for the future since it is lower in cost, uses less material, generates less greenhouse gas and produces good results. The caveat is that a potential project should be large enough to justify the mobilization costs and the roadway area recycled should be large enough to justify bringing in large equipment of this type.

The project was selected as the Roads and Bridges Hot –in-Place recycling project of the year by the Asphalt Recycling and Reclaiming Association.

John B. Hauskins can be reached at (602) 506-4622 or johnhauskins@mail.maricopa.gov.

Project Ignition Names Top Ten High Schools Leading Change in Teen Driver Behavior
From the National Youth leadership Council, June 5, 2013

Ten high schools across the United States have made this year's top ten list of schools that are changing teen driving behavior. These schools were selected by Project Ignition — a service-learning teen driver safety program sponsored by State Farm® and coordinated by the National Youth Leadership Council® — based on criteria including student participation, campaign results, and connection to classroom learning objectives.

Twenty-five schools received an initial $2,000 investment from Project Ignition in January, each seeking to reduce risky driving attitudes and behaviors in their community. For their successful efforts, ten of these schools will receive continued funding of $2,500 in the coming school year to expand upon their campaigns. In addition, each will receive $5,000 to participate in the 25th Annual National Service-Learning Conference®, hosted by NYLC, on April 9 – 12, 2014 in Washington, D.C.

The Project Ignition Top Ten Teen Driver Safety Campaigns:

- Central Linn High School, Halsey, OR
- E. A. Laney High School, Wilmington, NC
- The Early Middle College at Bennett, Greensboro, NC
- East Central High School, Brookville, IN
- Freehold Township High School, Freehold, NJ
- Har-Ber High School, Springdale, AR
- Kalamazoo Central High School, Kalamazoo, MI
- Palos Verdes Peninsula High School, Rolling Hills Estates, CA
- Pasco High School, Pasco, WA
- Sheldon Community Schools, Sheldon, IA

NYLC believes that youth leadership is a critical component to effectively changing teen driving behaviors and saving lives. "The statistic that teens are the most vulnerable to car accidents is very real and preventative measures need to be taken. Project Ignition gives these teens the opportunity to demonstrate leadership in a real world issue directly through service-learning — an educational strategy which has been proven to increase academic and community engagement among students," said Kelita Svoboda Bak, NYLC CEO. "In partnership with State Farm, we continue to look for ways to recognize the amazing accomplishments by young people through Project Ignition and all of NYLC's programs."

These campaigns serve as models for other schools looking to apply for a Project Ignition grant in the 2013-2014 school year. More details about the grant opportunity will be available in August, 2013.

Rockfall Characterization and Control
By A. Keith Turner and G.P. Jayaprakash

Rockfall: Characterization and Control, a five-year effort of a Transportation Research Board (TRB) task force, examines all aspects of rockfall characterization, analysis, and mitigation. Authored by a dozen internationally recognized rockfall experts, the book’s 18 chapters address the state of knowledge about rockfall, the available procedures for rockfall investigation, and regulatory and economic climates affecting rockfall investigations and corrective actions.

The 650-plus page book was directed by the same editorial team that produced TRB Special Report 247, Landslides: Analysis and Mitigation, published to acclaim in 1996 and still in demand. Rockfall: Characterizations and Control provides critically important information about methods of analyzing rockfall phenomena and about selecting rockfall mitigation options that have emerged in the years since the publication of Special Report 247. To view the article on Rockfall: Characterization and Control that was published in the January-February 2013 issue of TR News, go to: http://onlinepubs.trb.org/onlinepubs/general/RockfallBrochure.pdf
Every Day Counts Round Two

FHWA rolled out a second wave of innovations for its Every Day Counts initiative. All focused on shortening the time needed to complete highway projects through the use of new technologies and ground-breaking processes. Here’s a quick summary of what to expect:

- Programmatic Agreements II
- Locally Administered Federal-Aid Projects
- Three-Dimensional Modeling
- Intelligent Compaction
- Accelerated Bridge Construction
- Design Build
- Construction Manager/General Contractor
- Alternative Technical Concepts
- High Friction Surfaces
- Intersection and Interchange Geometrics
- Geospatial Data Collaboration
- Implementing Quality Environmental Documentation
- SHRP 2 National Traffic Incident Management Responder Training

FHWA will promote these 13 innovations to state, local and regional transportation agencies, as well as to the design and construction industries. These initiatives range from modern construction management techniques to paving machinery designed to use GPS. For the next two years, our teams of specialists will promote and explain the benefits to stakeholders across the country.

EDC-Exchange for Local and Tribal Agencies is a regularly scheduled series of participatory webinars which combine web-based presentation with in-person group participation. EDC Exchanges describe effective project development and delivery practices, tools and “market ready” technologies that local and tribal transportation agencies can readily implement into their programs.

For anyone interested in the EDC initiative, the Western TTAP can coordinate a conference to view the webinar offerings.

Upcoming webinars:

- UHPC for Precast Bridge Decks and Connections: Design Guide, Construction Experience, and Owner Perspective, June 25, 2013. 2:30 PM – 4:00 PM EST
- FRP Composite Bridge Decking: Development, Qualification Testing, and Installation of a Non-Proprietary System. July 23, 2013. 2:30 – 4:00 pm Eastern

For more information please visit the FHWA Every Day Counts website at: [http://www.fhwa.dot.gov/everydaycounts/](http://www.fhwa.dot.gov/everydaycounts/)
This information is provided expressly for educational purposes. The Western TTAP hopes to inform and educate tribal communities about legislation that may impact California and Nevada tribal communities and their tribal transportation programs. The following legislation was current at the time of publication. Legislation may change or be repealed. For further information, please check the status of the legislation at the respective website sources noted below.

Due to the overwhelming number of pending transportation related bills in the California, Nevada, and Federal Legislatures we have created a downloadable file on the NIJC Website that lists each bill, the sponsor, the status, and a brief summary. To view and download the file go to: http://www.nijc.org/ttap_legislation.html

ANNOUNCEMENT

Governor Brown Announces Appointment

SACRAMENTO – Governor Edmund G. Brown Jr. announced the following appointment.

Jacqueline Hostler-Carmesin, 57, of McKinleyville, has been appointed to the California Fish and Game Commission. Hostler has been chief executive officer at Cher A’E Heights Indian Community of the Trinidad Rancheria since 2010 and was director of transportation and land-use planning from 2007 to 2009. She was roads director at the Hoopa Tribal Roads Department from 2003 to 2007. Hostler-Carmesin served in multiple positions at the Redwood Empire Aggregates Inc. from 1990 to 2002, including payroll administrator and contract administrator. She was appointed to the National Ocean Council Governance Coordinating Committee by President Barack Obama in 2011 as one of three tribal representatives for the United States. Hostler-Carmesin has been the primary California representative to the National Tribal Transportation Program since 2005 and vice chair since 2010. She has been a member of the CalTrans Native American Advisory Committee since 2006. This position requires Senate confirmation and the compensation is $100 per diem. Hostler-Carmesin is a Republican

Cynthia Gomez, Tribal Advisor

Community Transportation Safety and Security Accreditation (CTSSA)
The program is designed to promote the safety and security of the customers of community and public transportation systems and also to promote the safety and security of the women and men who deliver these services and provide mobility for the riding public every day.

For more information go to: http://web1.ctaa.org/webmodules/webarticles/annviewer.asp?a=32&z=36

Minnesota Local Technical assistance Program (LTAP)
Gravel Road Maintenance and Design (Online)
This course helps supervisory personnel and operators better understand the materials, techniques, and equipment needed for maintaining gravel roads.
To enroll in the course go to: http://www.mnltap.umn.edu/training/topic/maintenance/gravel/online.html

Curbing Transit Employee Distracted Driving
The 30-minute course, was developed by FTA in conjunction with the Florida Department of Transportation It’s an excellent tool to educate, inform, and increase awareness among all transit workers about the dangers and challenges associated with distracted driving.
For more information go to: http://www.fta.dot.gov/newsroom/12910_14467.html

Work-Zone Safety Tutorial
Minnesota LTAP has launched a new online free tutorial that offers a convenient opportunity for new, seasonal, or temporary staff to learn about the fundamentals of work-zone safety and the basic concepts of the work-zone area before arriving at the job site.
There is no cost to take the tutorial, and registration is not required.
To view the tutorial go to: http://www.mnltap.umn.edu/training/web/workzone/

PUBLICATIONS

The following are the most recent publications received and entered into the National Indian Justice Center (NIJC) data base. The NIJC web site has the complete list of publications going back several years.
To view the Tribal Transportation (TTAP) Resources data base go to: http://nijc.org/datasheets/ttap/ TTAP_Resourceslist.asp

VIDEOS AND DVDS

Environmental Justice in Transportation for California Tribes Video Workbook
Produced by the National Indian Justice Center. Available at: 707-579-5507 or, http://nijc.org/publications.html

Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users.
The Forest Service, Bureau of Land Management and Federal Highway Administration have jointly developed training videos to show how the various programs authorized within SAFETEA-LU can benefit public lands and their neighboring communities. The training video can be found at: http://www.fs.fed.us/eng/safetea-lu

FHWA LTAP/TTAP Clearinghouse
Operators Pre-Start Motor Grading Inspection Promotes motor grader safety and productivity for county and city road agencies.

Roadway Safety + Training Program Version 9 Is a standard method of providing worker awareness training for road workers. The RSP+ download includes interactive Macromedia modules, Trainee Booklets, Toolbox Pamphlets, printable screen guides, and an Instructor Manual. Most are provided in 3 languages. Download program from www.workzonesafety.org To obtain copies of the videos contact Sarah Crane at 202-289-4434, or e-mail scrane@artba.org

FHWA Office of Safety Design

FHWA Office of Safety
2009 Road Safety Audit (RSA) Video
FHWA has created a new video on Road Safety Audits (RSAs). The new RSA video focuses on the benefits of using a multidisciplinary approach to improve safety. For more information or to view the video go to: http://safety.fhwa.dot.gov/rsa/video2009/

FHWA Office of Safety
Modern Roundabouts: A Safer Choice (FHWA-SA-10-023) The video explains the many benefits of roundabout intersections and is intended primarily for decision makers in state and local transportation agencies to overcome the common barriers and reasons for not considering roundabouts as intersection alternatives. It is presented in a non-technical manner and can be used at public meetings for proposed roundabout projects. For more information go to: http://safety.fhwa.dot.gov/intersection/roundabouts/

Sign Retroreflectivity Informational Presentations
The Center for Technology & Training at the Michigan Tech Transportation Institute has developed a web based informational presentation designed to help local agencies begin the discussion of sign retroreflectivity with decision-makers. To download the videos go to: http://ctt.mtu.edu/SignRetroPresentations.html

Zero Fatalities Utah DOT
Reggie P. Shaw Video
His vehicle drifted across the highway centerline and side-swiped an oncoming vehicle on Sept. 22, 2006. The officers investigated and found out that Shaw was text messaging during the time of his accident. To view the video go to: http://ut.zerofatalities.com/?utm_medium=email&utm_source=Transportation%20Research%20Board&utm_campaign=TRB+E-Newsletter+-+08-25-2009&utm_content=Web&utm_term.

Tribal School Zone Safety: Video and Toolkit
To obtain a free DVD, Please contact: Chimai Ngo, 202-366-1231

Roadway Safety Audit (RSA) Software
Is intended to be a guiding and process tracking tool enabling the use of RSA prompt lists at variety of detail levels, while providing a way to accompany each safety issue raised with a discussion and assessment. To download the software go to: http://www.roadwaysafety.org/run-off-road-dvd-2/

Rumble on the Reservation
This 11-minute DVD highlights rumble strips as a cost-effective crash countermeasure that American Indian commu-
nities can incorporate into roadway safety projects on tribal lands.
Roadway Safety Foundation
Please contact us at 202-857-1228 or info@roadwaysafety.org to order free copies

Dine Biitah: “Among the People”, Scenic Byway
Threads its way through over a hundred miles of Navajo land, people, culture and natural beauty.
To obtain a copy go to:
http://www.nijc.org/ttap_resources.html

The Safety Edge: Your Angle for Reducing Roadway Departure Crashes
FHWA-SA-10-033
Informational DVD to introduce you to a cost-effective treatment that has proven to provide results by saving lives.
To obtain a copy of the DVD go to:
http://www.nijc.org/ttap_resources.html

Every Day Counts Course for Locals

One Design—10,000 Bridges
Thousands of bridges across America must be replaced. A new tool kit for designing and constructing bridges brings home the benefits of accelerated bridge construction techniques so local contractors can use typical equipment to build bridges quickly and efficiently. Developed through the second Strategic Highway Research Program, a division of the Transportation Research Board, the tool kit was demonstrated in construction of a bridge over the Keg Creek near Council Bluffs, Iowa.
To View the video go to:
http://www.trb.org/StrategicHighwayResearchProgram2SHRP2/Pages/Video-One_Design-10,000_Bridges_536.aspx

Video Demonstrations of Three SHRP 2 Products Now Available
Step-by-step demonstrations narrated by the principal investigators of three SHRP 2 products that were featured in the SHRP 2 booth at the 91st TRB Annual Meeting are now available on the SHRP 2 website
• Geotechnical Solutions for Transportation Infrastructure: a web tool that provides guidance for soil improvement, rapid embankment construction, and stabilization of the pavement working platform
• Transportation Project Impact Case Studies (T-PICS): a national database of case studies that can be used to assess the pre- and post-construction economic development and related effects of various kinds of transportation projects
• My Road Trip Advisor: a tool that predicts arrival times for travelers based on travel time reliability information
To view the videos go to:
http://www.trb.org/StrategicHighwayResearchProgram2SHRP2/Pages/_SHRP_2_Video_Demonstrations_at_the_91st_TRB_Annual_Meeting_533.aspx

Ordering Information
Printed copies of our in-house publications are available on a first-come, first served basis. Priority is given to Tribal Transportation Personnel. PDF versions of most of our publications are available on our website:
http://www.nijc.org/ttap_resources.html
All our videos, publications and CD-ROMs in our lending library are loaned for a four-week period. Two titles may be borrowed at a time.
To order or borrow materials, please send a request to: barry@nijc.org or, nijc@aol.com or Fax a request to:707-579-9019.
To view past issues of publications, videos and development programs, please visit our website library at:
http://nijc.org/datasheets/ttap/TTAP_Resourcelist.asp
NOTE: many of the listed transportation programs are dependent on the implementation of MAP-21.

CALIFORNIA DEPARTMENT OF TRANSPORTATION (CALTRANS)

The State-Legislated Safe Routes to School Program
July 6, 2012, MAP-21, the Moving Ahead for Progress in the 21st Century Act was signed into law. Under MAP-21, SRTS was consolidated into the Transportation Alternatives Program (TAP), but is eligible for Surface Transportation Program (STP) and Highway Safety Improvement Program (HSIP) funds.

September 27, 2012, Caltrans proposed funding SRTS from a $21 million set aside in the STP. This concept was approved by the CTC as a one year policy. Future funding for SRTS will be determined through the MAP-21 Implementation process.

http://www.dot.ca.gov/hq/LocalPrograms/saferoutes/saferoutes.htm

Memorandum of Understanding (MOU)

The California Department of Transportation (Caltrans), in consultation with the Governor’s Office of Small Business Advocate, have entered into a Memorandum of Understanding (MOU) with the U.S. Small Business Administration (SBA), to offer a technical assistance surety bond guarantee program to promote increased small business participation in this initiative provides a viable means to advance the unimpeded participation of all willing, ready, and able construction contractors and subcontractors, professional architectural and engineering firms, suppliers and truckers, without regard to race, ethnicity, gender, or physical disability to participate in the State’s Contracting Program.

For more information contact a Small Business Development Center in your area, or call Linda Madden 919-324-8384; e-mail Linda_Madden@dot.ca.gov

California Department of Resources Recycling and Recovery (CalRecycle)

CalRecycle offers a variety of grant funding opportunities to assist public and private entities in safely and effectively managing California’s waste stream. Deadline to apply.

- Beverage Container Recycling Grants
- Farm and Ranch Cleanup Grants—Jul. 16, 2013, Oct. 29,

2013 and Feb. 11, 2014

- Local Enforcement Agency Grants
- Solid Waste Disposal and Site Cleanup Grants Tire Recycling, Cleanup, and Enforcement Grants
- Used Oil Recycling Grants

Additional grant information and list of active grants can be found at:

http://www.calrecycle.ca.gov/Grants/default.htm

Highway Safety Improvement Program (HSIP)

It is never too early for local agencies to analyze their roadway network to 1) identify their highest crash locations and corridors, 2) consider effective and efficient countermeasures to improve the safety of these locations/corridors, and 3) identify projects that have the highest Benefit-to-Cost ratios.

Caltrans announced HSIP Cycle 6 Call for Projects on April 29, 2013. The application due date for this Call for Projects is Friday, July 26, 2013. Applications received or postmarked after July 26, 2013 will not be accepted. Applications should be submitted to the attention of your Caltrans District Local Assistance Engineer (DLAE).

http://www.dot.ca.gov/hq/LocalPrograms/HSIP/apply_now.htm

NEVADA

Nevada Department of Transportation (NDOT)

Safe Routes to School Program

For more information regarding the Nevada Safe Routes to School, please visit:

http://www.walknevada.com/

Nevada Transportation Enhancement Program

The Nevada Department of Transportation (NDOT) and the Federal Highway Administration (FHWA) share your interest in these projects and others that enhance the transportation experience in your area and make our communities more livable. The TE program was developed to fund projects that go beyond where typical transportation projects usually stop.

For more information go to:

http://www.nevadadot.com/Projects_and_Programs/Landscape_and_Aesthetics/Landscape_Aesthetics_Program.aspx
FEDERAL

U.S. DEPARTMENT OF TRANSPORTATION

Federal Safe Routes to School Program (SRTS)
The Federal Safe Routes to School program (SRTS) was authorized by SAFETA-LU (the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users). This federal program has different eligibility and local match requirements than the state-legislated program. For more information on this program go to: http://www.dot.ca.gov/hq/LocalPrograms/saferoutes/srts.htm

Federal Transit Administration

Public Transportation On Indian Reservations (FTA 5311)
Federally recognize tribes may use the funding for capital, operating, planning, and administrative expenses for public transit projects that meet the growing needs of rural tribal communities. Examples of eligible activities include: capital projects; operating costs of equipment and facilities for use in public transportation; and the acquisition of public transportation services, including service agreements with private providers of public transportation services.

To view the MAP-21 Fact Sheet: Formula Grants for Rural Areas Section 5311 go to: http://www.fta.dot.gov/documents/MAP-21_Fact_Sheet_Formula_Grants_for_Rural_Areas.pdf

For the program information go to: http://www.fta.dot.gov/grants/13094_3553.html

FHWA

Surface Transportation Environment and Planning Cooperative Research Program
The STEP is the primary source of funds for FHWA to conduct research and develop tools and technologies to advance the state of the practice regarding national surface transportation and environmental decision-making. In FY 2010, FHWA sought partnerships that leveraged limited research funding in STEP with other stakeholders and partners in order to increase the total amount of resources available to meet the nation’s surface transportation research needs. The anticipated FY2012 STEP research efforts are preliminary and subject to change. In FY 2010, STEP addressed national research priorities that included:

1. Conducting research to develop climate change mitigation and adaptation strategies;
2. Improving state of the practice regarding livability and the impact of transportation on the environment;
3. Developing and/or supporting accurate models and tools for evaluating transportation measures and developing indicators of economic, social, and environmental performance of transportation systems;
4. Developing and deploying research to address congestion reduction efforts;
5. Developing transportation safety planning strategies for surface transportation systems and improvements;
6. Improving planning, operation, and management of surface transportation systems and rights of way;
7. Enhancing knowledge of strategies to improve transportation in rural areas and small communities;
8. Strengthening and advancing State/local and tribal capabilities regarding surface transportation and the environment;
9. Improving transportation decision-making and coordination across borders;
10. Conducting research to promote environmental streamlining/stewardship;
11. Disseminating research results and advances in state of the practice through peer exchanges, workshops, conferences, etc;
12. Meeting additional priorities as determined by the Secretary; and
13. Refining the scope and research emphases through active outreach and in consultation with stakeholders.

The number of stakeholders with an interest in environment and planning research is enormous and diverse, includes three tiers:

Tier 1 - Federal Agencies and Tribes: There are at least a score of Federal agencies with strong interest in transportation planning and environmental programs including: the Departments of Commerce, Defense, Homeland Security, Agriculture, Energy, Interior (DOI) and Housing and Urban Development, the Environmental Protection Agency (EPA), and the Centers for Disease Control and Prevention (CDC).

Within each of these agencies, there are many discrete organizations/programs with an interest - e.g., National Park Service, U.S. Fish and Wildlife Service and Bureau of Land Management within the DOI. Within the US De Department of Transportation (USDOT), FHWA partners with the Federal Transit Administration (FTA) on virtually all planning and environmental work, including research. The FHWA also coordinates with the Federal
FUNDING (Continued)

Railroad, Aviation, Research and Innovative Technology, National Highway Traffic Safety and Maritime Administrations, and with the Office of the Secretary of Transportation on Global Climate Change as well as other issues. There are over 500 federally recognized Native American Tribes, which have a major interest in research affecting their planning and environmental needs.

For more information go to:  

Dwight David Eisenhower Transportation Fellowship Program
Eisenhower Tribal Colleges and Universities Fellowship Provides Students in those schools with opportunities to pursue careers in Transportation. This fellowship also serves as a feeder for other Eisenhower Fellowships. Currently funded at $2.2M annually. For more information go to  
http://www.fhwa.dot.gov/tpp/ugp.htm

National Scenic Byways Program
Under the program, the U.S. Secretary of Transportation recognizes certain roads as National Scenic Byways or All-American Roads based on their archaeological, cultural, historic, natural, recreational, and scenic qualities. The program allows Indian Tribes to submit applications directly to FHWA division offices, and authorizes FHWA to enter into project or grant agreements directly with Indian Tribes. For more information go to:  
http://www.bywaysonline.org/

Bureau of Indian Affairs
Traffic Safety on Indian Reservations
The Secretary of Transportation, Bureau of Indian Affairs ("BIA"), has announced that funds will be available to federally recognized Indian tribes on an annual basis for implementing traffic safety projects designed to reduce the number of traffic crashes, death, injuries, and property damage within Indian Country. Applications due May 1 of each program year. For more information go to:  

U.S. Department of Agriculture
USDA Rural Development Grants
The mission is to increase economic opportunity and improve the quality of life for rural residents. Rural Development fosters growth in homeownership, finances business development, and supports the creation of critical community and technology infrastructure. Further information on rural programs is available at a local USDA Rural Development web site:  
http://www.rurdev.usda.gov/BCP_rbeg.html
Nevada:  
http://www.rurdev.usda.gov/NVHome.html
California:  
http://www.rurdev.usda.gov/CA-Home.html

FEMA: Hazard Mitigation Grant Program
Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. This definition distinguishes actions that have a long-term impact from those that are more closely associated with immediate preparedness, response, and recovery activities. Hazard mitigation is the only phase of emergency management specifically dedicated to breaking the cycle of damage, reconstruction, and repeated damage. As such, States, Territories, Indian Tribal governments, and communities are encouraged to take advantage of funding provided by HMA programs in both the pre- and post-disaster timeframes. Together, these programs provide significant opportunities to reduce or eliminate potential losses to State, Tribal, and local assets through hazard mitigation planning and project grant funding. Each HMA program was authorized by separate legislative action, and as such, each program differs slightly in scope and intent. The Hazard Mitigation Grant Program (HMGP) may provide funds to States, Territories, Indian Tribal governments, local governments, and eligible private non-profits following a Presidential major disaster declaration. The Pre-Disaster Mitigation (PDM), Flood Mitigation Assistance (FMA), Repetitive Flood Claims (RFC), and Severe Repetitive Loss Pilot (SRL) programs may provide funds annually to States, Territories, Indian Tribal governments, and local governments. For more information go to:  
http://www.fema.gov/government/grant/hmgp/index.shtm

Department of Commerce, Economic Development Administration
Economic Development Assistance Programs –and- Planning and Local Technical Assistance Programs EDA’s mission is to lead the Federal economic development agenda by promoting innovation and competitiveness, preparing American regions for growth and success in the worldwide economy. In implementing this mission pursuant to the Public Works and Economic Develop-
Environmental Protection Agency
The U.S. Environmental Protection Agency (EPA), as part of its Science to Achieve Results (STAR) program, is seeking applications proposing research on science for sustainable and healthy tribes. This solicitation is focused on research to develop sustainable solutions to environmental problems that affect tribes.

Public nonprofit institutions/organizations (includes public institutions of higher education and hospitals) and private nonprofit institutions/organizations (includes private institutions of higher education and hospitals) located in the U.S., state and local governments, Federally Recognized Indian Tribal Governments, and U.S. territories or possessions are eligible to apply.

EPA plans to host three webinars to discuss this RFA and respond to questions. See Section IV for further information about the webinars.

Closed for FY 2013
