High Friction Surface Treatments
U.S.DOT –Federal Highway Administration (FHWA)

Horizontal curves made up only 5 percent of our Nation’s highway miles in 2008. Yet, more than 25 percent of highway fatalities in the United States occur at or near horizontal curves each year. While some of the factors contributing to these crashes include excessive vehicle speed or distracted driving and driver error, at some locations, the deterioration of pavement surface friction may also be a contributing factor. Variable friction creates the need to consider pavement improvements for surface characteristics, particularly for friction, at certain locations in order to increase safety.

High friction surface treatments (HFST) are the site-specific application of very high-quality, durable aggregates using a polymer binder that restores and maintains pavement friction where the need for a safer pavement surface is the greatest. Maintaining the appropriate amount of pavement friction is critical for safe driving. Vehicles traversing horizontal curves require a greater side force friction, and vehicles at intersections require greater longitudinal force friction.

In locations such as sharp horizontal curves and where vehicles may brake excessively, the road surface of standard pavements may become prematurely polished, thereby reducing the available pavement friction. This loss of friction contributes to vehicles losing control or skidding at high speed, causing drivers to turn abruptly or brake excessively. Negotiating a sharper curve requires an increased friction demand, and that greater demand causes greater shear forces on the surface aggregate, thereby leading to even more polishing of the surface aggregate.

The HFST technology is unique in its ability to address site-specific issues. While the largest numbers of problem locations are likely to be on the local and collector systems, there are also high-volume intersections, interchange ramps, and selected segments of Interstate alignments where these treatments would also be beneficial. This innovation has application to State departments of transportation (DOTs), counties, cities, tribes and federal lands agencies across the country.

**BENEFITS**

- **Reduce crashes, injuries and fatalities.** Kentucky placed HFST on 26 curves and to date has seen an average reduction from 6.2 to 1.9 crashes per year at those locations. Additionally, the National Cooperative Highway Research Program (NCHRP) 617 indicates a crash reduction of 20 percent for all intersection crashes.
- **Benefits outweigh costs.** A recent before-and-after study from South Carolina DOT for a series of curve instal-
The National Indian Justice Center is located in Santa Rosa, California. NIJC’s building also houses the administrative offices of the California Indian Museum and Cultural Center, the Intertribal Court of California and the Regional Tribal Justice Center. Construction is currently underway for the California Indian Museum and Cultural Center, which will include a storytelling venue, Native plants garden, California Indian foods, a small Native village, audio-visual displays that highlight California Indian history and the contributions of California Indians, as well as Edward Curtis prints and traveling exhibits. If you are in the area, please come visit and tour the facilities.

Tools for Improving Pedestrian Safety

It’s Up to All of Us: A Pedestrian Safety Public Education Campaign and California Department of Public Health’s Communication for Pedestrian Safety: Risk, Response & Change by Raquelle Myers, Western TTAP

Specific California data concerning race and pedestrian injuries and fatalities is difficult to determine since the implementation of Proposition 209 which generally prohibits state agencies from collecting racial data. Effective January 1, 2002, the California Highway Patrol Statewide Integrated Traffic Records System (SWITRS) database began using the following racial categories: Asian, Other, Black, White, Hispanic, and Blank. Data about the American Indian/Alaska Native (AI/AN) pedestrian injuries and fatalities may be found in the NCSA Fatality Analysis Reporting System (FARS). We currently know the following about AI/AN pedestrian data in California:

Based upon the available information, it is imperative that California tribal communities focus on strategies for improving pedestrian safety particularly among tribal youth and elders. Effective tools have been developed by the California Department of Public Health (CDPH) that Tribes can use to address pedestrian safety concerns.

It’s Up to All of Us is a pedestrian safety public education campaign that incorporates tools for communities to engage the community and implement strategies for improving pedestrian safety. “It’s Up to All of Us” is funded by the California Office of Traffic Safety through a collaborative project with the CDPH Pedestrian Safety Program. The campaign draws on CDPH’s longstanding work in the use of public education campaigns to influence individual and community behavior through norm change. Campaign materials are available free of charge and include a series of 18 media templates. Materials can be used “as is” or customized to address local needs. Download the campaign materials from: http://www.cdph.ca.gov/HealthInfo/injviosaf/Pages/ItsUp2Us.aspx.

The National Indian Justice Center received funding from CDPH to adapt the media templates to include culturally relevant graphics and messaging. Download the files at http://www.nijc.org/ttap_trans_safety.html.

In 2009, CDPH produced a comprehensive workbook, “Communication for Pedestrian Safety: Risk, Response and Change” which provides communities with a “how to guide” for applying risk communication and norm change principles and practices to pedestrian safety. NIJC has developed a public service announcement and a workshop presentation on how Tribes may use these materials. Download the files at http://www.nijc.org/ttap_trans_safety.html.
(Continued from page 1)

- **Relatively low in cost compared to geometric improvements.** The square-foot cost of HFST is not cheap, but its durability makes it worth the cost since the treatments are long-lasting and the life-cycle cost is excellent.
- **Durable and long-lasting.** HFST provide a durable and long-lasting solution to pavement locations where insufficient friction is a contributing factor in crashes.
- **Customizable to specific State and local safety needs.** Road owners can use where most needed, such as two-lane urban or rural roads at horizontal curves, areas near steep grades, areas at or near lane changes and rural and urban intersections.
- **Produce negligible environmental impacts and minimal impact on traffic.** Project lengths are short and the materials set up very quickly so the treatments can often be applied in hours, requiring minimal impact on traffic as compared to a conventional pavement overlay project.

CURRENT STATE OF THE PRACTICE

Shown in Figure 1, at least 39 states have applied HFST on at least one project site to date. Nine of the 39 states that have HFST installed have gone on to aggressively deploy use of HFST. Strides have been made also in the development of more versatile and accurate friction measurement equipment, which plays a part in the identification and documentation of problem sites, as well as in the documentation of friction improvement provided by HFST.

SUPPORT AND AVAILABLE TOOLS

There are a variety of ongoing efforts to implement and evaluate HFST. A few of the noted efforts include:
- The Federal Highway Administration’s (FHWA) Office of Pavement Technologies and the Office of Technical Services – Resource Center have installed and tested the friction improvements with various types of applications on surface characteristics and are now ready to share their findings via a series of reports that will be available next year. A number of case studies are documented at: [http://www.highfrictionroads.com/](http://www.highfrictionroads.com/) as a part of this effort.
- Converting the results of the many projects into crash modification factors for these types of treatments is underway as part of the FHWA’s Evaluation of Low-Cost Safety Improvements Pooled-Fund Study.
- The Office of Safety has included HFST in their countermeasures recommended on curves when developing the Roadway Departure Safety Implementation Plan in Roadway Departure Focus States.
Case Study: California Department of Transportation

The California Department of Transportation Caltrans Roadway Departure Safety Plan in 2011 identified 179 locations and approximately 50 other locations where HFST has been or will be placed.

California has placed 10 HFST applications to date. However, 50 additional applications are planned, including one at a high-speed, signalized intersection. The majority of the applications will be for the end of on-ramps and on the curves of two-lane roadways. Caltrans is moving forward with the projects as a result of information obtained from other states and information provided during webinars. Based on the information from webinars, Caltrans’ specifications call for calcined bauxite only. Previously, Caltrans mainly used open-grade asphalt concrete (OGAC) to reduce wet pavement collisions along with grinding and grooving. However, OGAC could not be installed at locations where there were freezing temperatures. An additional benefit of HFST when compared with OGAC is the ability to install on any pavement surface without concern for cross drainage.

CASE STUDY – RTE. 105 SEPULEDA BLVD ON-RAMP IN LOS ANGELES, CALIFORNIA. HFST INSTALLED IN FEBRUARY 2011

The I-105 Sepulveda Blvd. on-ramp, a primary egress point from the Los Angeles Airport, was notoriously closed during rain events to prevent expected crashes. The average daily traffic is 31,000. Crashes occurred as a result of the tight curvature, the low friction, and aggressive driving by motorists. The closure of this highly utilized ramp resulted in numerous complaints to Caltrans. The latest five years of crash data showed that 68 of the 85 crashes were wet pavement crashes. Since Caltrans applied HFST to about 1,300 linear feet of the ramp, it has not been closed. The pre- and post-application friction values were 32 and approximately 60, respectively. Due to the volumes of crash data processed, post-application crash experience data is not available at this time.

Every Day Counts (EDC), a State-based initiative of FHWA’s Center for Accelerating Innovation, works with State, local and private sector partners to encourage the adoption of proven technologies and innovations aimed at shortening and enhancing project delivery.
For more information go to: www.fhwa.dot.gov/everydaycounts
The nation's roads and highways are the backbone of the U.S. transportation system, allowing Americans to travel approximately 3 trillion miles annually. But conditions on the system are deteriorating, as the need for transportation improvements far outpaces the amount of state and federal funding available. As Nevada and the nation look to rebound from the recent economic downturn, making needed improvements to roads, bridges and public transit could provide a significant boost to the state’s economy by creating jobs and stimulating long-term economic growth as a result of enhanced mobility and access.

MAP-21 (the Moving Ahead for Progress in the 21st Century Act), the current long-range federal surface transportation program, was signed into law on July 6, 2012. The first long-term highway authorization enacted since 2005, MAP-21 funds surface transportation programs at over $105 billion for fiscal years 2013 and 2014. The level of funding and the provisions of the federal surface transportation program have a significant impact on the state’s highway and bridge conditions, roadway safety, transit service, quality of life and economic development opportunities.

Federal Funding for Our Nation’s Surface Transportation System Generates Jobs; Making Needed Highway Improvements Assures Economic Recovery and Growth

• Enhancing critical transportation assets will boost the economy in the short-term by creating jobs in construction and related fields. In the long-term these improvements will enhance economic competitiveness and improve the quality of life for the state’s residents and visitors by reducing travel delays and transportation costs, improving access and mobility, improving safety, and stimulating sustained job growth.

• A Federal Highway Administration study concludes that for each $1 billion of federal spending on highway construction nationwide nearly 28,000 jobs are generated annually, including approximately 9,500 in the construction sector, approximately 4,300 jobs in industries supporting the construction sector, and approximately 14,000 other jobs induced in non-construction related sectors of the economy.

• The Federal Highway Administration estimates that each dollar spent on road, highway and bridge improvements results in an average benefit of $5.20 in the form of reduced vehicle maintenance costs, reduced delays, reduced fuel consumption, improved safety, reduced road and bridge maintenance costs and reduced emissions as a result of improved traffic flow.

• Seventy-eight percent of the $53 billion worth of commodities delivered annually from sites in Nevada is transported by trucks on the state’s highways. An additional 18 percent is delivered by parcel, U.S. Postal Service or courier, which use multiple modes, including highways.

• Sixty-seven percent of the $1.3 trillion worth of commodities delivered annually from sites in California is transported by trucks on the state’s highways. An additional 20 percent is delivered by parcel, U.S. Postal Service or courier, which use multiple modes, including highways.

Current Road and Bridge Conditions, Travel Trends and Traffic Congestion

Americans rely almost exclusively on motor vehicles for mobility. Travel in private vehicles accounts for 88 percent of all person miles of travel. Air travel accounts for eight percent of all person miles of travel, while transit (including buses and trains) accounts for one percent.

Vehicle travel on America’s highways increased by 37 percent from 1990 to 2010, while new road mileage increased by only four percent. The nation’s population grew by 25 percent from 1990 to 2010.
Nevada | California
--- | ---
- Nineteen percent of Nevada’s roads are in poor or mediocre condition. Driving on roads in need of repair costs Nevada motorists $538 million a year in extra vehicle repairs and operating costs – $316 per motorist. | - Sixty-one percent of California’s major roads are in poor or mediocre condition. Driving on roads in need of repair costs California motorists $14.8 billion a year in extra vehicle repairs and operating costs – $618 per motorist.
- Fourteen percent of Nevada’s bridges are structurally deficient or functionally obsolete. | - Twenty-nine percent of California’s bridges are structurally deficient or functionally obsolete.
- Fifty-nine percent of Nevada’s major urban highways are congested. Traffic congestion costs American motorists $121 billion a year in wasted time and fuel costs. | - Sixty-eight percent of California’s major urban highways are congested. Traffic congestion costs American motorists $121 billion a year in wasted time and fuel costs.
- Vehicle travel on Nevada’s highways increased by 137 percent from 1990 to 2011. Nevada’s population grew by 130 percent between 1990 and 2012. | - Vehicle travel on California’s highways increased by 24 percent from 1990 to 2011. California’s population grew by 28 percent between 1990 and 2012.

**Roadway Improvements Can Save Lives and Reduce Traffic Crashes**

Where appropriate, highway improvements such as removing or shielding obstacles, adding or improving medians, widening lanes and shoulders, upgrading roads from two lanes to four lanes, and improving road markings and traffic signals can reduce traffic fatalities and accidents and improve traffic flow to help relieve congestion.

According to a study conducted by the Federal Highway Administration, $100 million spent on highway safety improvements will save 145 lives over a 10-year period.

| Nevada | California |
--- | ---
- Roadway conditions are a significant factor in approximately one-third of traffic fatalities. There were 246 traffic fatalities in 2011 in Nevada. A total of 1,443 people died on Nevada’s highways from 2007 through 2011. | - Roadway conditions are a significant factor in approximately one-third of traffic fatalities. There were 2,791 traffic fatalities in 2011 in California. A total of 16,016 people died on California’s highways from 2007 through 2011.
- Nevada’s traffic fatality rate of 1.02 fatalities per 100 million vehicle miles of travel is lower than the national average of 1.10. | - California’s traffic fatality rate of 0.87 fatalities per 100 million vehicle miles of travel is lower than the national average of 1.10.
- Motor vehicle crashes cost Nevada $1.9 billion per year, $938 for each resident, in medical costs, lost productivity, travel delays, workplace costs, insurance costs and legal costs. | - Motor vehicle crashes cost California $21 billion per year, $610 for each resident, in medical costs, lost productivity, travel delays, workplace costs, insurance costs and legal costs.

Data from the U.S Census, the U.S. Department of Transportation, the Federal Highway Administration, the Bureau of Transportation Statistics, the National Highway Traffic Safety Administration and the Texas Transportation Institute was compiled and analyzed by TRIP, a nonprofit transportation research group based in Washington, D.C. Information is the latest available.

**Legislation to Watch**

Assembly Bill 52

Assembly Member Gatto, introduced 12/21/12.

Last amended in the Senate 9/5/13

Status: 9/10/13 Joint Rule 61(a) suspended. The 2013 Legislative session has ended.

Native Americans: California Environmental Quality Act.

The bill would specify that a project having a potential to cause a substantial adverse change in the significance of a tribal resource, as defined, to be a project that may have a significant effect on the environment. The bill would require a lead agency to make best efforts to avoid, preserve, and protect specified Native American resources. The bill would require the lead agency to undertake specified actions if a project may adversely affect tribal cultural resources. The bill would additionally define “unique archaeological resource” to include archaeological artifacts, objects, or sites, including those that are tribal cultural resources. The bill would require the office to revise the guidelines to include among the criteria for determining whether a proposed project has a significant effect on the environment to include the effects on tribal cultural resources, including sacred places. The bill would require the office to prepare and develop, and the secretary to certify and adopt, revisions to the guidelines relating to the identification and treatment of tribal cultural resources. By requiring the lead agency to consider these effects relative to Native Americans and to conduct additional consultations, this bill would impose a state-mandated local program.

The Federal Highway Administration (FHWA) is charged with the broad responsibility of ensuring that America’s roads and highways continue to be the safest and most technologically up-to-date. Although State, local, and tribal governments own most of the Nation’s highways, FHWA provides financial and technical support to them for constructing, improving, and preserving America’s highway system.

The Central Federal Lands Highway Division (CFLHD) operates as part of the Federal Lands Highway Program, serving the needs of all central states. CFLHD actively administers the surveying, designing and constructing of forest highway system roads, parkways and park roads, Indian reservation roads, defense access roads, and other Federal lands roads. CFLHD also provides training, technology, deployment, engineering services, and products to other customers.

The Office of Federal Lands Highway (FLH) provides program stewardship and transportation engineering services for planning, design, construction, and rehabilitation of the highways and bridges that provide access to and through federally owned lands.

The primary purpose of the FLHP is to provide financial resources and technical assistance for a coordinated program of public roads that service the transportation needs of Federal and Indian lands.

The Federal Transit Administration (FTA) is one of 10 modal administrations within the U.S. Department of Transportation. Headed by an Administrator who is appointed by the President of the United States, FTA administers federal funding to support a variety of locally planned, constructed, and operated public transportation systems throughout the U.S., including buses, subways, light rail, commuter rail, streetcars, monorail, passenger ferry boats, inclined railways, and people movers.

The Rural Transit Assistance Program (RTAP) The mission is to address the needs of rural, small urban and tribal transit operators across the nation.
National Local Technical Assistance Program Association (NLTAPA)
A not-for-profit organization representing and serving the 58 LTAP and TTAP Member-Centers in the United States and Puerto Rico All staff of Member-Centers are entitled to Association services and opportunities to Serve. www.nltapa.org

Bureau Of Indian Affairs
There are millions of acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 566 federal recognized tribal governments in the United States. Developing forest-lands, leasing assets on these lands, directing agricultural programs, protecting water and land rights, developing and maintaining infrastructure and economic development are all part of the agency's responsibility. In addition, the Bureau of Indian Affairs provides education services to approximately 48,000 Indian students.

TRIBAL TRANSPORTATION RESOURCES

Roundabouts
Roundabouts are circular intersections. Roundabouts reduce traffic conflicts (for example, left turns) that are frequent causes of crashes at traditional intersections. Unlike a traffic circle or a rotary, a roundabout's incoming traffic yields to the circulating traffic. For more information visit the website at: http://safety.fhwa.dot.gov/intersection/roundabouts/

Roundabout Outreach and Education Toolbox
This Toolbox is designed to be a highly useable, online reference that connects transportation professionals with outreach resources from across the country to help them obtain public support for roundabouts. To utilize the tool box go to: http://safety.fhwa.dot.gov/intersection/roundabouts/roundabouttoolbox/

Roadway Worker Safety Website
The U.S. Federal Highway Administration’s Office of Operations has launched a new page on its Work Zone Safety website designed to be a central source of data and links to information and technical resources on roadway worker safety. To visit the website go to: http://www.ops.fhwa.dot.gov/wz/workersafety/index.htm

Training, Tools, Guidance and Countermeasures for Locals
Local and Rural team is continuously looking for new ways to meet the needs of local and rural road owners and operators. Insuring that tools meet the needs of the users and that they have the resources and training they need to effectively use the tools is a critical part of the solution. To visit the web site go to: http://safety.fhwa.dot.gov/local_rural/training/

Local & Rural Road (LRR) Safety Peer-to-Peer (P2P) Program
Open to public highway agencies seeking to adequately address safety problems on their local and rural road network. To visit the website go to: http://safety.fhwa.dot.gov/local_rural/training/p2p/

TRANSPORTATION PROGRAMS AND DEVELOPMENT (Continued)

Paul S. Sarbanes Transit in Parks Technical Assistance Center (TRIPTAC)
The TRIPTAC is available to all Federal Land Management Agencies (FLMAs), not only those applying for or receiving funds from the Transit in Parks program. State, local or tribal governments who are working in collaboration with an FLMA to expand public lands access are also welcome to use TRIPTAC services to obtain alternative transportation information and assistance.
To view available training courses go to:
http://www.triptac.org/

University of California, Berkeley, Institute of Transportation Studies.
Technology Transfer Program
To visit the website go to:
http://www.techtransfer.berkeley.edu/

Michigan Transportation Institute-Center for Technology and Training
Sign Retro Management Selection Tool helps you estimate how much it will cost your organization to implement different Federal Highway Administration sign retroreflectivity maintenance methods using your organization’s specific costs and implementation scenarios.
To register for the tool go to:
http://ctt.mtu.edu/ToolRegistration.html

U.S. Small Business Administration (SBA)
Online Courses for Starting Your Business
Several free online courses are offered by the SBA to help prospective and existing entrepreneurs understand the basics about writing a business plan.
For more information go to:
http://www.sba.gov/content/online-courses-starting-your-business

Community Transportation Association of America (CTAA)
Passenger Service and Safety PASS Basic Training Program
The PASS Basic program consists of 6 modules and includes comprehensive training on the assistance that drivers should be providing to passengers with special need.
For more information go to:
http://training.ctaa.org/

Community Transportation Safety and Security Accreditation (CTSSA)
The program is designed to promote the safety and security of the customers of community and public transportation systems and also to promote the safety and security of the women and men who deliver these services and provide mobility for the riding public every day.
For more information go to:

Minnesota Local Technical Assistance Program (LTAP)
Gravel Road Maintenance and Design (Online)
This course helps supervisory personnel and operators better understand the materials, techniques, and equipment needed for maintaining gravel roads.
To enroll in the course go to:
http://www.mnltap.umn.edu/training/topic/maintenance/gravel/online.html

Curbing Transit Employee Distracted Driving
The 30-minute course, was developed by FTA in conjunction with the Florida Department of Transportation It’s an excellent tool to educate, inform, and increase awareness among all transit workers about the dangers and challenges associated with distracted driving.
For more information go to:
http://www.fta.dot.gov/newsroom/12910_14467.html

Work-Zone Safety Tutorial
Minnesota LTAP has launched a new online free tutorial that offers a convenient opportunity for new, seasonal, or temporary staff to learn about the fundamentals of work-zone safety and the basic concepts of the work-zone area before arriving at the job site.
There is no cost to take the tutorial, and registration is not required.
To view the tutorial go to:
http://www.mnltap.umn.edu/training/web/workzone/

VIDEOS AND DVDS

Environmental Justice in Transportation for California Tribes Video Workbook
Produced by the National Indian Justice Center.
Available at: 707-579-5507 or,
http://nijc.org/publications.html

Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users.
The Forest Service, Bureau of Land Management and Federal Highway Administration have jointly developed training videos to show how the various programs authorized within SAFETEA-LU can benefit public lands and their neighboring communities.
The training video can be found at: http://www.fs.fed.us/eng/safetea-lu

FHWA Office of Safety Design
Two informational videos on DVD.
FHWA-SA-08-007. Median Barriers—A Solution to Cross-Median crashes.
FHWA-SA-07-024. The previously released video, Rumble Strips—A Sound Investment.
Order from FHWA Report Center – publication number Report.center@fhwa.dot.gov.

FHWA Office of Safety
2009 Road Safety Audit (RSA) Video
FHWA has created a new video on Road Safety Audits (RSAs). The new RSA video focuses on the benefits of using a multidisciplinary approach to improve safety. For more information or to view the video go to:
**TRIBAL TRANSPORTATION RESOURCES**

**FHWA office of Safety**  
Modern Roundabouts: A Safer Choice (FHWA-SA-10-023)  
The video explains the many benefits of roundabout intersections and is intended primarily for decision makers in state and local transportation agencies to overcome the common barriers and reasons for not considering roundabouts as intersection alternatives. It is presented in a non-technical manner and can be used at public meetings for proposed roundabout projects.  
For more information go to:  
http://safety.fhwa.dot.gov/intersection/roundabouts/

**FHWA Research and Technology**  
Long-Term Pavement Performance (LTPP) Program  
The Long-Term Pavement Performance (LTPP) program makes the world’s largest pavement performance database available annually to the public in Microsoft Access® format and available on thumb drive or DVD-ROM. The Standard Data Release (SDR) may be obtained through LTPP Customer Support Services at: E-mail: ltppinfo@dot.gov  
For more information go to:  

**Sign Retroreflectivity Informational Presentations**  
The Center for Technology & Training at the Michigan Tech Transportation Institute has developed a web based informational presentation designed to help local agencies begin the discussion of sign retroreflectivity with decision-makers.  
To download the videos go to:  
http://ctt.mtu.edu/SignRetroPresentations.html

**Zero Fatalities Utah DOT**  
Reggie P. Shaw Video  
His vehicle drifted across the highway centerline and side-swiped an oncoming vehicle on Sept. 22, 2006. The officers investigated and found out that Shaw was text messaging during the time of his accident.  
To view the video go to:  

**Tribal School Zone Safety: Video and Toolkit**  
To obtain a free DVD, Please contact:  
Chimai Ngo, 202-366-1231

**Roadway Safety Foundation**  
New Run-Off-Road/Rumble Strip Brochure and Recognize-React-Recover DVD  
To obtain free copies of the brochure and DVD go to:  

**Road Safety Audit (RSA) Software**  
Is intended to be a guiding and process tracking tool enabling the use of RSA prompt lists at variety of detail levels, while providing a way to accompany each safety issue raised with a discussion and assessment  
To download the software go to:  
http://safety.fhwa.dot.gov/rsa/software/

**Rumble on the Reservation**  
This 11-minute DVD highlights rumble strips as a cost-effective crash countermeasure that American Indian communities can incorporate into roadway safety projects on tribal lands.  
Roadway Safety Foundation  
Please contact us at 202-857-1228 or info@roadwaysafety.org to order free copies

**Dine Biitah: “Among the People”, Scenic Byway**  
Threads its way through over a hundred miles of Navajo land, people, culture and natural beauty.  
To obtain a copy go to:  
http://www.nijc.org/ttap_resources.html

**The Safety Edge: Your Angle for Reducing Roadway Departure Crashes**  
FHWA-SA-10-033  
Informational DVD to introduce you to a cost-effective treatment that has proven to provide results by saving lives.  
To obtain a copy of the DVD go to:  
http://www.nijc.org/ttap_resources.html

**Every Day Counts Course for Locals**  
Ohio Department of Transportation (ODOT)  
For more information go to:  
http://nijc.org/datasheets/ttap/TTAP_Resourceslist.asp

**Rural Road Crashes – They’re Preventable**  
Iowa Department of Transportation  
To view the DVD or obtain a copy go to:  
http://www.iowadot.gov/mvd/ods/RuralRoadCrashes.html#

**One Design—10,000 Bridges**  
Thousands of bridges across America must be replaced. A new tool kit for designing and constructing bridges brings home the benefits of accelerated bridge construction techniques so local contractors can use typical equipment to build bridges quickly and efficiently. Developed through the second Strategic Highway Research Program, a division of the Transportation Research Board, the tool kit was demonstrated in construction of a bridge over the Keg Creek near Council Bluffs, Iowa.

TRIBAL TRANSPORTATION RESOURCES

Ordering Information
Printed copies of our in-house publications are available on a first-come, first served basis. Priority is given to Tribal Transportation Personnel. PDF versions of most of our publications are available on our website:
http://www.nijc.org/ttap_resources.html

All our videos, publications and CD-ROMs in our lending library are loaned for a four-week period. Two titles may be borrowed at a time.

To order or borrow materials, please send a request to: barry@nijc.org or, nijc@aol.com or Fax a request to:707-579-9019.

To view past issues of publications, videos and development programs, please visit our website library at:
http://nijc.org/datasheets/ttp/TAP_Resourceslist.asp
TRIBAL TRANSPORTATION FUNDING RESOURCES

Announcement

Yurok Tribe Announces Dial-A-Ride Service for Klamath Community
From the Times Standard

The Yurok Tribe announced this week the start of a new Dial-A-Ride transit service. The Yurok Tribal Transit Service will provide a new transportation option for community members in the Klamath area. The transit vehicle is an eight-passenger 4x4 van equipped with a hydraulic wheel chair lift. The Yurok tribal transportation department has received funding to offer these transit services from the United States Department of Transportation, Federal Transit Authority.

The new Dial Ride service will provide transit services to all residents in and around the Klamath area, including services to Crescent City. The Yurok Tribe has been working on numerous projects to provide jobs and opportunities in Klamath and to improve transportation infrastructure and mobilization services that benefit the region.

“We are pleased to offer and expand our efforts to improve transportation to the community of Klamath,” said Yurok Tribe ViceChair Susan Masten.

The new transit services are a direct result of the tribe’s “innovative approach” to work cooperatively with community partners and funding agencies.

“The Yurok Tribe continues to provide a multifaceted approach for the Klamath community's growing transportation needs,” said Joseph James, Yurok transportation manager.

“We look forward to continue to work for partnerships and the ability to offer more transportation infrastructure improvements and transit services to all who use and depend on it,” said Peggy O'Neil, director of the tribe’s Planning & Community Development Department.

For the Dial-A-Ride service, call Yurok Tribal Transit Service at 482-0731. One-way fare costs $1 for all riders.

NOTE: many of the listed transportation programs are dependant on the implementation of MAP-21.

CALIFORNIA DEPARTMENT OF TRANSPORTATION (CALTRANS)

The State-Legislated Safe Routes to School Program
July 6, 2012, MAP-21, the Moving Ahead for Progress in the 21st Century Act was signed into law. Under MAP-21, SRTS was consolidated into the Transportation Alternatives Program (TAP), but is eligible for Surface Transportation Program (STP) and Highway Safety Improvement Program (HSIP) funds.

September 27, 2012, Caltrans proposed funding SRTS from a $21 million set aside in the STP. This concept was approved by the CTC as a one year policy. Future funding for SRTS will be determined through the MAP-21 Implementation process.

http://www.dot.ca.gov/hq/LocalPrograms/saferoutes/saferoutes.htm

Memorandum of Understanding (MOU)

The California Department of Transportation (Caltrans), in consultation with the Governor’s Office of Small Business Advocate, have entered into a Memorandum of Understanding (MOU) with the U.S. Small Business Administration (SBA), to offer a technical assistance surety bond guarantee program to promote increased small business participation in this initiative provides a viable means to advance the unimpeded participation of all willing, ready, and able construction contractors and subcontractors, professional architectural and engineering firms, suppliers and truckers, without regard to race, ethnicity, gender, or physical disability to participate in the State’s Contracting Program.

For more information contact a Small Business Development Center in your area, or call Linda Madden 919-324-8384; e-mail Linda_Madden@dot.ca.gov

California Department of Resources Recycling and Recovery (CalRecycle)

CalRecycle offers a variety of grant funding opportunities to assist public and private entities in safely and effectively managing California’s waste stream. Deadline to apply.
TRIBAL TRANSPORTATION FUNDING RESOURCES

- Beverage Container Recycling Grants
- **Farm and Ranch Cleanup Grants**—Oct. 29, 2013 and Feb. 11, 2014
- Household Hazardous Waste (HHW) Grants
- Local Enforcement Agency Grants
- **Illegal Disposal Site Abatement Grant Program**—November 5, 2013, and February 4, 2014.
- Waste Tire Cleanup grants for FY 2014/15 will tentatively be available winter 2013.
- Rubberized Pavement (TRP) Grant Program—FY 2014/15 solicitation are tentatively scheduled to be available in Spring 2014.
- Tire-Derived Aggregate (TDA) Grant Program—FY 2013/14 will tentatively be available Fall 2013.
- Tire-Derived Product Grant Program—FY 2014/15 solicitation are tentatively scheduled to be available in Spring 2014.
- Used Oil Recycling Grants

Additional grant information and list of active grants can be found at: [http://www.calrecycle.ca.gov/Grants/default.htm](http://www.calrecycle.ca.gov/Grants/default.htm)

**Highway Safety Improvement Program (HSIP)**

It is never too early for local agencies to analyze their roadway network to 1) identify their highest crash locations and corridors, 2) consider effective and efficient countermeasures to improve the safety of these locations/corridors, and 3) identify projects that have the highest Benefit-to-Cost ratios.

Caltrans Cycle 7 to be determined.

For more information go to: [http://www.dot.ca.gov/hq/LocalPrograms/HSIP/apply_now.htm](http://www.dot.ca.gov/hq/LocalPrograms/HSIP/apply_now.htm)

**NEVADA**

**Nevada Department of Transportation (NDOT)**

**Safe Routes to School Program**

For more information regarding the Nevada Safe Routes to School, please visit: [http://www.walknevada.com/](http://www.walknevada.com/)

**Nevada Transportation Enhancement Program**

The Nevada Department of Transportation (NDOT) and the Federal Highway Administration (FHWA) share your interest in these projects and others that enhance the transportation experience in your area and make our communities more livable. The TE program was developed to fund projects that go beyond where typical transportation projects usually stop.

For more information go to:

[http://www.nevadadot.com/Projects_and_Programs/Landscape_and_Aesthetics/Landscape_Aesthetics_Program.aspx](http://www.nevadadot.com/Projects_and_Programs/Landscape_and_Aesthetics/Landscape_Aesthetics_Program.aspx)

**FEDERAL**

**U.S. DEPARTMENT OF TRANSPORTATION**

**Transportation Alternatives Program (TAP)**

- Safe Routes to School Program.
- National Scenic Byways

The Moving Ahead for Progress in the 21st Century Act (MAP-21) authorized the Transportation Alternatives Program (TAP) to provide funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, community improvement activities, and environmental mitigation; recreational trail projects; safe routes to school projects; and projects for planning, designing, or constructing boulevards and other roadways largely in the right-of-way of former divided highways. The TAP replaced the funding from pre-MAP-21 programs including the Transportation Enhancement Activities, Recreational Trails Program.

For more information go to: [http://www.fhwa.dot.gov/environment/transportation_alternatives/](http://www.fhwa.dot.gov/environment/transportation_alternatives/)

**National Center for Safe Routes to School**

Several potential sources of Safe Routes to School funding exist, and most programs benefit from combining a variety of these sources.

To view the sources go to: [http://www.saferoutesinfo.org/funding-portal](http://www.saferoutesinfo.org/funding-portal)

**Federal Transit Administration**

**Public Transportation On Indian Reservations (FTA 5311)**

Federally recognize tribes may use the funding for capital, operating, planning, and administrative expenses for public transit projects that meet the growing needs of rural tribal communities. Examples of eligible activities include: capital projects; operating costs of equipment and facilities for use in public transportation; and the acquisition of public transportation services, including service agreements with private providers of public transportation services.

For the program information go to: [http://www.fta.dot.gov/grants/13094_3553.html](http://www.fta.dot.gov/grants/13094_3553.html)
**TRIBAL TRANSPORTATION FUNDING RESOURCES**

**FHWA**

*Dwight David Eisenhower Transportation Fellowship Program*
Eisenhower Tribal Colleges and Universities Fellowship Provides Students in those schools with opportunities to pursue careers in Transportation. This fellowship also serves as a feeder for other Eisenhower Fellowships. Currently funded at $2.2M annually.
For more information go to  
http://www.fhwa.dot.gov/tpp/ugp.htm

**U.S. Department of Agriculture**

USDA Rural Community Development Initiative (RCDI)  
Funding Opportunity No.: USDA-RD--HCFP-RCDI-2013  
The mission is to increase economic opportunity and improve the quality of life for rural residents. Rural Development fosters growth in homeownership, finances business development, and supports the creation of critical community and technology infrastructure.

**FY 2013 Deadline to apply is November 12, 2013**
For grant information go to:  
http://www07.grants.gov/search-grants.html?agencies%3DUSDA|Department%20of%20Agriculture  
Further information on rural programs is available at a local USDA Rural Development web site:

**FEMA: Hazard Mitigation Grant Program**

FY 2013 Tribal Homeland Security Grant Program (THSGP)  
**Purpose:** The FY 2013 THSGP is one tool among a comprehensive set of initiatives authorized by Congress and implemented by the Administration to help strengthen the Nation against risks associated with potential terrorist attacks. Funding under THSGP is provided to strengthen Tribes' capacity to prepare for and respond to emergency situations.

The FY 2013 THSGP plays an important role in the implementation of the National Preparedness System (NPS) by supporting the building, sustainment, and delivery of core capabilities essential to achieving the National Preparedness Goal (NPG) of a secure and resilient Nation. The building, sustainment, and delivery of these core capabilities are not exclusive to any single level of government, organization, or community, but rather, require the combined effort of the whole community. The FY 2013 THSGP supports all core capabilities in the Prevention, Protection, Mitigation, Response, and Recovery mission areas based on allowable costs.

Indian Housing Block Grant Program (IHBG)  
Funds appropriated by Congress for the Indian Housing Block Grant Program (IHBG) are made available to eligible grant recipients through a formula. Regulations governing the formula can be found at 24 CFR Part 1000, Subpart D. On April 20, 2007, the Native American Housing Assistance and Self Determination Final Rule was published revising the IHBG Formula.

In brief, the formula has two components; Need and Formula Current Assisted Stock. The Need component considers population, income, and housing conditions. The Formula Current Assisted Stock component reflects housing developed under the United States Housing Act (the predecessor of the IHBG program) which is owned and/or operated by the IHBG recipient and provides funds for ongoing operation of the housing.

An Indian tribe may challenge the Need portion of the IHBG formula provided the data are gathered, evaluated, and presented in a manner that is fair and equitable for all participating tribes. Tribes have until March 30 of each year to submit challenges to their Needs data in consideration for the upcoming fiscal year.

National Indian Justice Center is rolling out the “Tribal Prosecutor’s Handbook for Prosecution of DUls in Indian Country.” This new handbook served as the foundation for NIJC’s “Prosecuting DUls in Indian Country” training held in Albuquerque, New Mexico on August 1-2, 2013. The handbook and curriculum are part of National Indian Justice Center’s Tribal Traffic Safety Liaison Project.

The Tribal Prosecutor’s Handbook for Prosecution of DUI’s in Indian Country offers an effective and culturally competent resource to service providers working with American Indian and Alaskan Native (AI/NA) victims of alcohol-related motor vehicle crashes. AI/AN victims experience the same issues of victimization as others involved in DUI and DWI motor vehicle crashes. However, these issues are exacerbated as a result of multiple factors involved in prosecuting DUI/DWI cases that occur near tribal lands, factors that range from procedural to cultural.

Some of the major procedural issues for AI/AN DUI victims relate to the delays and confusion associated with establishing jurisdiction for DUI prosecution. These delays affect the number of times a victim may be required to provide a statement (and thus re-live their experience). They can also make it more difficult for service providers to provide a clear timeline of the case. Both of these negatively impact victims, who are often an integral component to a DUI prosecution. The Tribal Prosecutor’s Handbook walks students through the process of establishing jurisdiction in DUI cases as well as evaluating the timelines and procedures involved.

Due to the location of many tribal lands, the access to resources for many Tribes can be limited. Additionally, the community impacts associated with a DUI case can significantly differ from other communities. Prosecutors who are new to Indian County may not be aware of these potential differences and the overall detrimental affect they can have on the victims and/or witnesses of their DUI prosecutions. The Tribal Traffic Safety Justice Liaison Project provides a database of available resources for both victims and prosecutors. Additionally, Tribal Prosecutor’s Handbook and curriculum offer a framework for cultural competency and working with victims in Tribal Communities. These tools will assist prosecutors and victim service providers to identify potential concerns they may need to address and recommended processes and tools for addressing them.

The Tribal Prosecutor’s Handbook and Prosecuting DUls in Indian Country curriculum are the next phase of the Tribal Traffic Safety Justice Liaison Project’s goal to improve tribal and non-Indian justice system responses to AI/NA victims’ of DUI and DWI motor vehicle crashes on or near tribal lands.
