

TRIBAL ROAD SAFETY: *DATA COLLECTION & REPORTING*

JULY 15-16, 2019
SANTA ROSA, CA

Presented By:

Rafat Raie,
PE, Deputy Director of Public Works, City Traffic Engineer, City of San Rafael

Afsaneh Yavari, TE
Research & Development Engineer
SafeTREC UC Berkeley

Raquelle Myers,
Staff Attorney

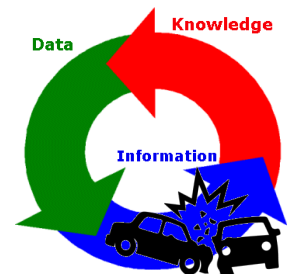

Benjamin Myers,
Staff Attorney

National Indian Justice Center

Project Background

The Tribal Crash Data Online Tool is the product of a collaboration between the University of California, Berkeley's Safe Transportation Research and Education Center (SafeTREC) and the National Indian Justice Center.

The project is designed to prevent traffic collisions and injuries by gathering accurate traffic and crash data on and near tribal lands. This project provides a starting point for California tribes to access and analyze tribal crash data from existing sources. In the long term, as tribes collect their own crash data, this online tool may be modified to incorporate tribal data.

About SafeTREC & NIJC

SafeTREC, founded in 2000, is part of the University of California, Berkeley, and is affiliated with the School of Public Health and the Institute of Transportation Studies.

NIJC, founded in 1983, designs and delivers legal education, research, and technical assistance programs which seek to improve the quality of life for Native communities and the administration of justice in Indian country. NIJC services may be contracted for local delivery.

Goals of the Training

The goals of the Training Session are to provide hands on access to the online crash data tool and to provide training on how to use the online data tool reports to support your transportation safety planning.

This training will also provide information about the next steps in the project which are to train tribes on crash data collection strategies. As tribes collect more local crash data, SafeTREC and NIJC would like to collaborate on how to include that data in the online data tool or SWITRS.

SafeTREC and NIJC are seeking participation from tribes to document crash fatalities and serious injuries on tribal land. They will work intensively with five (5) tribes willing to collect collision data that complies with the CHP Form 555 reporting criteria, with the goal of three (3) tribes committing to submit crash data to SWITRS.

TRIBAL ROAD SAFETY: *DATA COLLECTION & REPORTING*

JULY 15-16, 2019

SANTA ROSA, CA

LOGISTICS

This training will be conducted at the **National Indian Justice Center, 5250 Aero Drive, Santa Rosa, California**. All individuals are responsible for their own lodging, meals and per diem.
